

AURUM

GUEST PRESENTATION

A large collage of 30 images from the AURUM Global Launch event. The images show various scenes: speakers on stage, audience members clapping and taking photos, group photos of attendees and staff, and stage presentations. The text "WELCOME TO AURUM" is overlaid in large white letters across the center of the collage. The collage includes images of the AURUM logo, a large cake with "AURUM" written on it, and a presentation slide titled "The AURUM Shareholder Bonus" showing statistics like "59", "70K", and "4M". Other slides mention "AURUM Exchange Live Launch" and "AURUM Global Launch". The overall atmosphere is celebratory and professional.

AURUM IS A DECENTRALIZED FINTECH COMPANY,

dedicated to the development of innovative crypto products and AI-powered algorithms that redefine how users manage and grow their digital assets.

We offer a secure and efficient ecosystem where contribute capital, payments, and trading come together seamlessly, empowering both individuals and businesses to achieve their financial goals.

At Aurum, we are a team of **35+ top-tier professionals with extensive experience in finance, blockchain, and AI-driven trading**, bringing expertise from leading global companies, including Binance, Morgan Stanley, OKX, Wise, Bitget, and IBM Blockchain.

We bridge institutional finance and blockchain innovation, delivering AI-powered trading, risk management, and intelligent capital management tools.

Morgan Stanley

Wise

8 Data Analysts

Development of machine learning algorithms for analyzing and processing historical trading data from global markets.

Creation of the core AI model for the EX-AI algorithm.

12 years - Average team experience

Our team of developers and analysts has an average of 12 years of professional experience. We leverage our extensive expertise to create innovative products within our ecosystem.

10 Software Developers

Development and maintenance of the ecosystem.

Integration of algorithms and trading strategies into the company's products.

Identification and correction of vulnerabilities.

7 Financial Analysts

Creation and manual testing of new trading strategies.

Development of methodologies for news analysis.

Planning long-term positions and scaling the company.

Bryan Benson

Cheif Executive Officer

Binance became a **fintech unicorn** in just one year. At Aurum, we take a more **conservative** approach, setting this **as our goal for the next three years.**

A web3 pioneer **with 27 years of experience**, Bryan has led initiatives in crypto, blockchain, and DeFi across global markets. He previously **served as Director of Latin America at Binance**, driving blockchain adoption in emerging regions.

At **Aurum**, he drives **strategic growth** and access to digital assets, shaping innovative, **scalable solutions.**

Andrew Isaacs

Chief Operating Officer

Institutional finance is built on structure and execution. At **AURUM**, we apply these principles to **digital assets**, creating systems designed to scale.

A global finance executive with **18+ years** of experience, Andrew has worked on **\$23B+ in transactions** across institutional finance and digital assets.

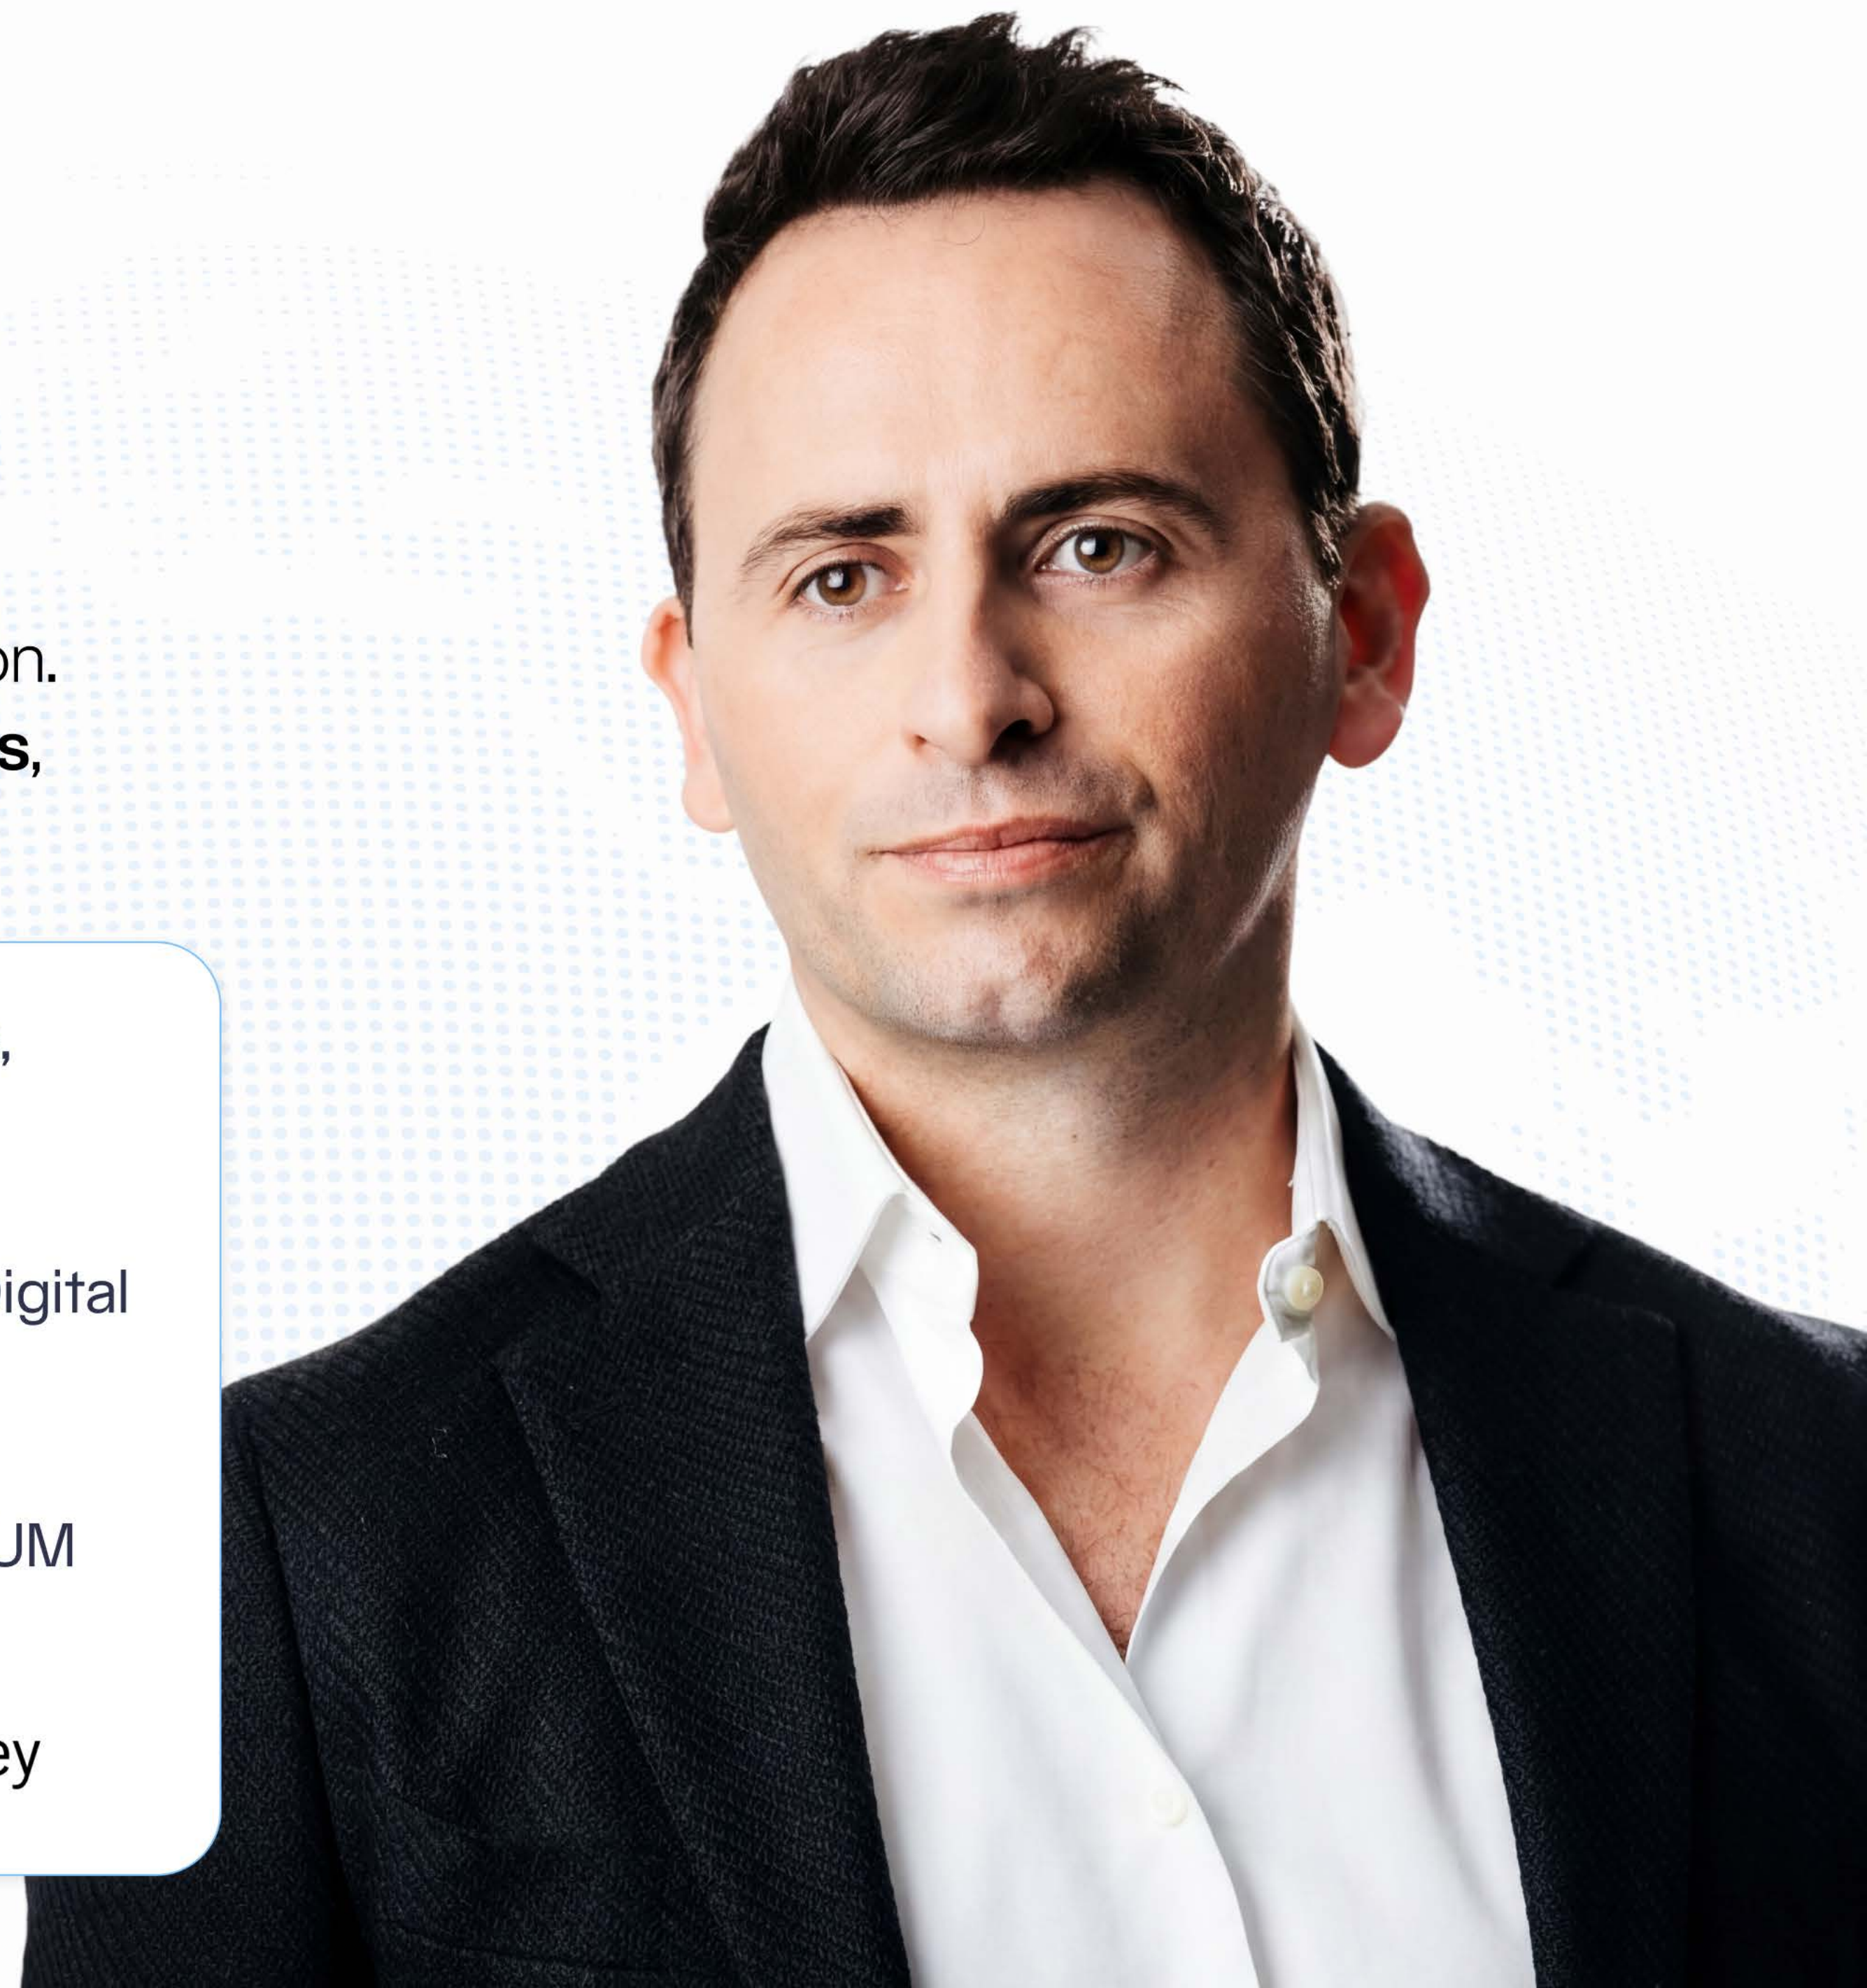

He previously served as **Managing Director** at Galaxy Digital and held roles at **Morgan Stanley** and Evercore.

At AURUM, he leads operational strategy and scalable execution, bringing institutional standards into the AURUM Ecosystem.

EVERCORE

Morgan Stanley

Ahmad Zen

Chief Marketing Officer

“My goal at Aurum is to build a leading community of hundreds of thousands of people in the next three years and provide them with financial tools for true financial freedom.”

Ahmad Zen is an expert with over 15 years of experience in crypto and network marketing.

At AURUM, Ahmad leads brand development and audience growth, aligning digital marketing execution with long-term ecosystem positioning and sustainable growth strategies.

Shane Morand

Chief Network Development Officer

“Scalable growth comes from systems that empower people at scale.

Shane Morand is a global business leader with decades of experience in network development and large-scale growth systems. He was part of the core team that scaled an international company from zero to \$1B in total sales in under five years, impacting 2.2 million families across more than 50 countries.

At AURUM, Shane focuses on network development, system scalability, and long-term ecosystem growth.

Leonardo Galindez

Chief Executive Officer AURUM Exchange

“Strong exchanges are defined by execution quality and regulatory resilience.”

Leonardo Galindez is an exchange founder with deep experience in regulated crypto and payment infrastructure. Former Binance strategic partner in South America, founder of Coincoinx, and leader of a major Bitcoin mining operation. He launched a Mastercard crypto program in Latin America, reaching 300,000+ users.

At AURUM, Leonardo leads AURUM Exchange, focused on institutional-grade execution and AI-driven infrastructure.

Ali Rizqi

Director of Strategy

“Every product should solve a problem, but the best products anticipate future needs. At Aurum, we are building solutions for the financial world of tomorrow.”

Ali Rizqi is a fintech and business development expert with over 6 years of experience across product strategy, market expansion, and digital financial solutions.

At AURUM, he shapes the product strategy, creating effective and innovative solutions that meet user needs and support the company's growth.

Nicholas Kelland

Head of Partnerships

“The future of Web3 depends on how well it connects to the real economy.”

Nicholas is a Web3 and fintech partnerships executive specializing in institutional relations and global business development. With 7+ years of experience, he builds scalable partnerships that connect Web3 innovation with established global infrastructure.

At AURUM, Nicholas leads the global partnerships strategy, focusing on high-impact institutional collaborations aligned with long-term ecosystem growth.

AURUM'S KEY ACHIEVEMENTS

600 M+ USDT

in Trading Volume

Our trading ecosystem, powered by AI algorithms and cutting-edge financial tools, has reached an impressive 600 million USDT in total trading turnover, reflecting both high activity and user success.

Launch of 8

innovative products

We've introduced products launched: EX-AI, EX-AI PRO, Zeus AI, Aurum Flash, Aurum NeoBank, Aurum Exchange, RWA, Neyro

25 M+ USDT

in AI-powered arbitrage trades

Our AI system has generated over 25M USDT through automated arbitrage trades, identifying and executing profitable market opportunities with speed and precision.

170 000+ AURUM Users

(Clients and Partners) Who Joined So Far

More than 170 000 users (clients and partners) have entrusted their growth to Aurum's secure, high-performance platform, underscoring our reputation for reliability and innovation.

AURUM — Legal & Corporate Structure

AURUM is built on a **transparent, multi-jurisdiction** legal foundation that **supports** global operations, **infrastructure** development, and **long-term scalability**. **Registered Legal Entities:**

Financial Ecosystem of the Company

ACCESS TO THE AURUM ECOSYSTEM – 19.99 USDT/YEAR

This annual fee is required to unlock all ecosystem features, including trading bots and participation in the partner program.

02

NEYRO

Non-custodial trading agents. Structured execution with full control over capital.

04

AURUM EXCHANGE

A next-generation cryptocurrency exchange designed to offer deep liquidity, institutional-grade security, and seamless integration with the AURUM Ecosystem.

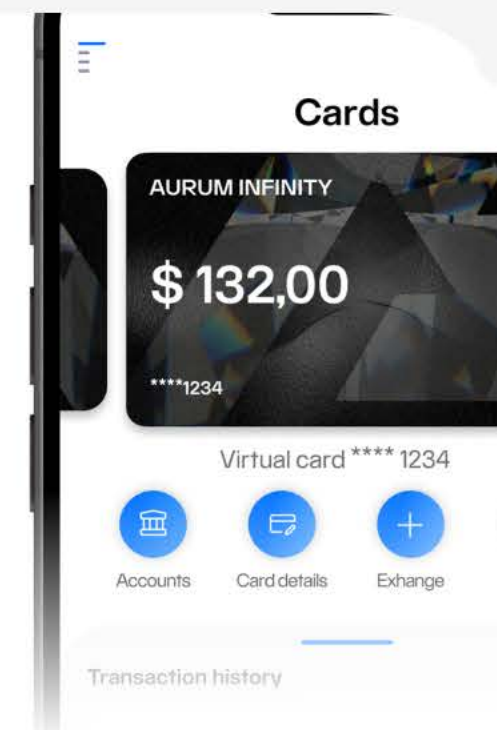

01

AI BOTS

direct integration with trading and liquidity pools

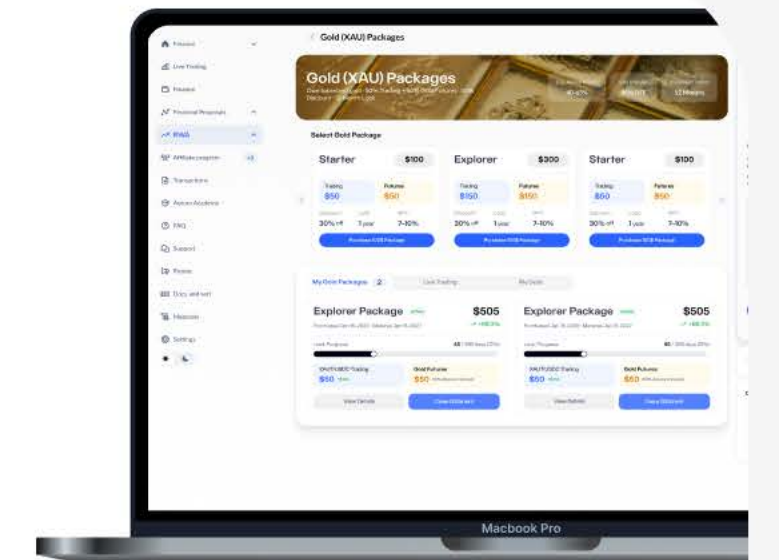

03

AURUM CARDS & NEOBANK

A unified layer for managing crypto and fiat assets. Pay globally, withdraw from ATMs, and access funds through a secure Web3 banking interface.

05

AURUM RWA

AURUM RWA connects real estate with digital finance — turning property into on-chain assets that generate income and bring real-world value to the AURUM Ecosystem.

The AURUM Ecosystem also includes additional products expanding its network and financial infrastructure

NEYRO. Non-Custodial Trading Agents

A new standard of **trading execution**.
AI agents operate within **user-defined**
parameters, combining non-custodial
architecture with structured on-chain
execution and full **control** over capital.

Neyro Core Advantages

Non-custodial architecture

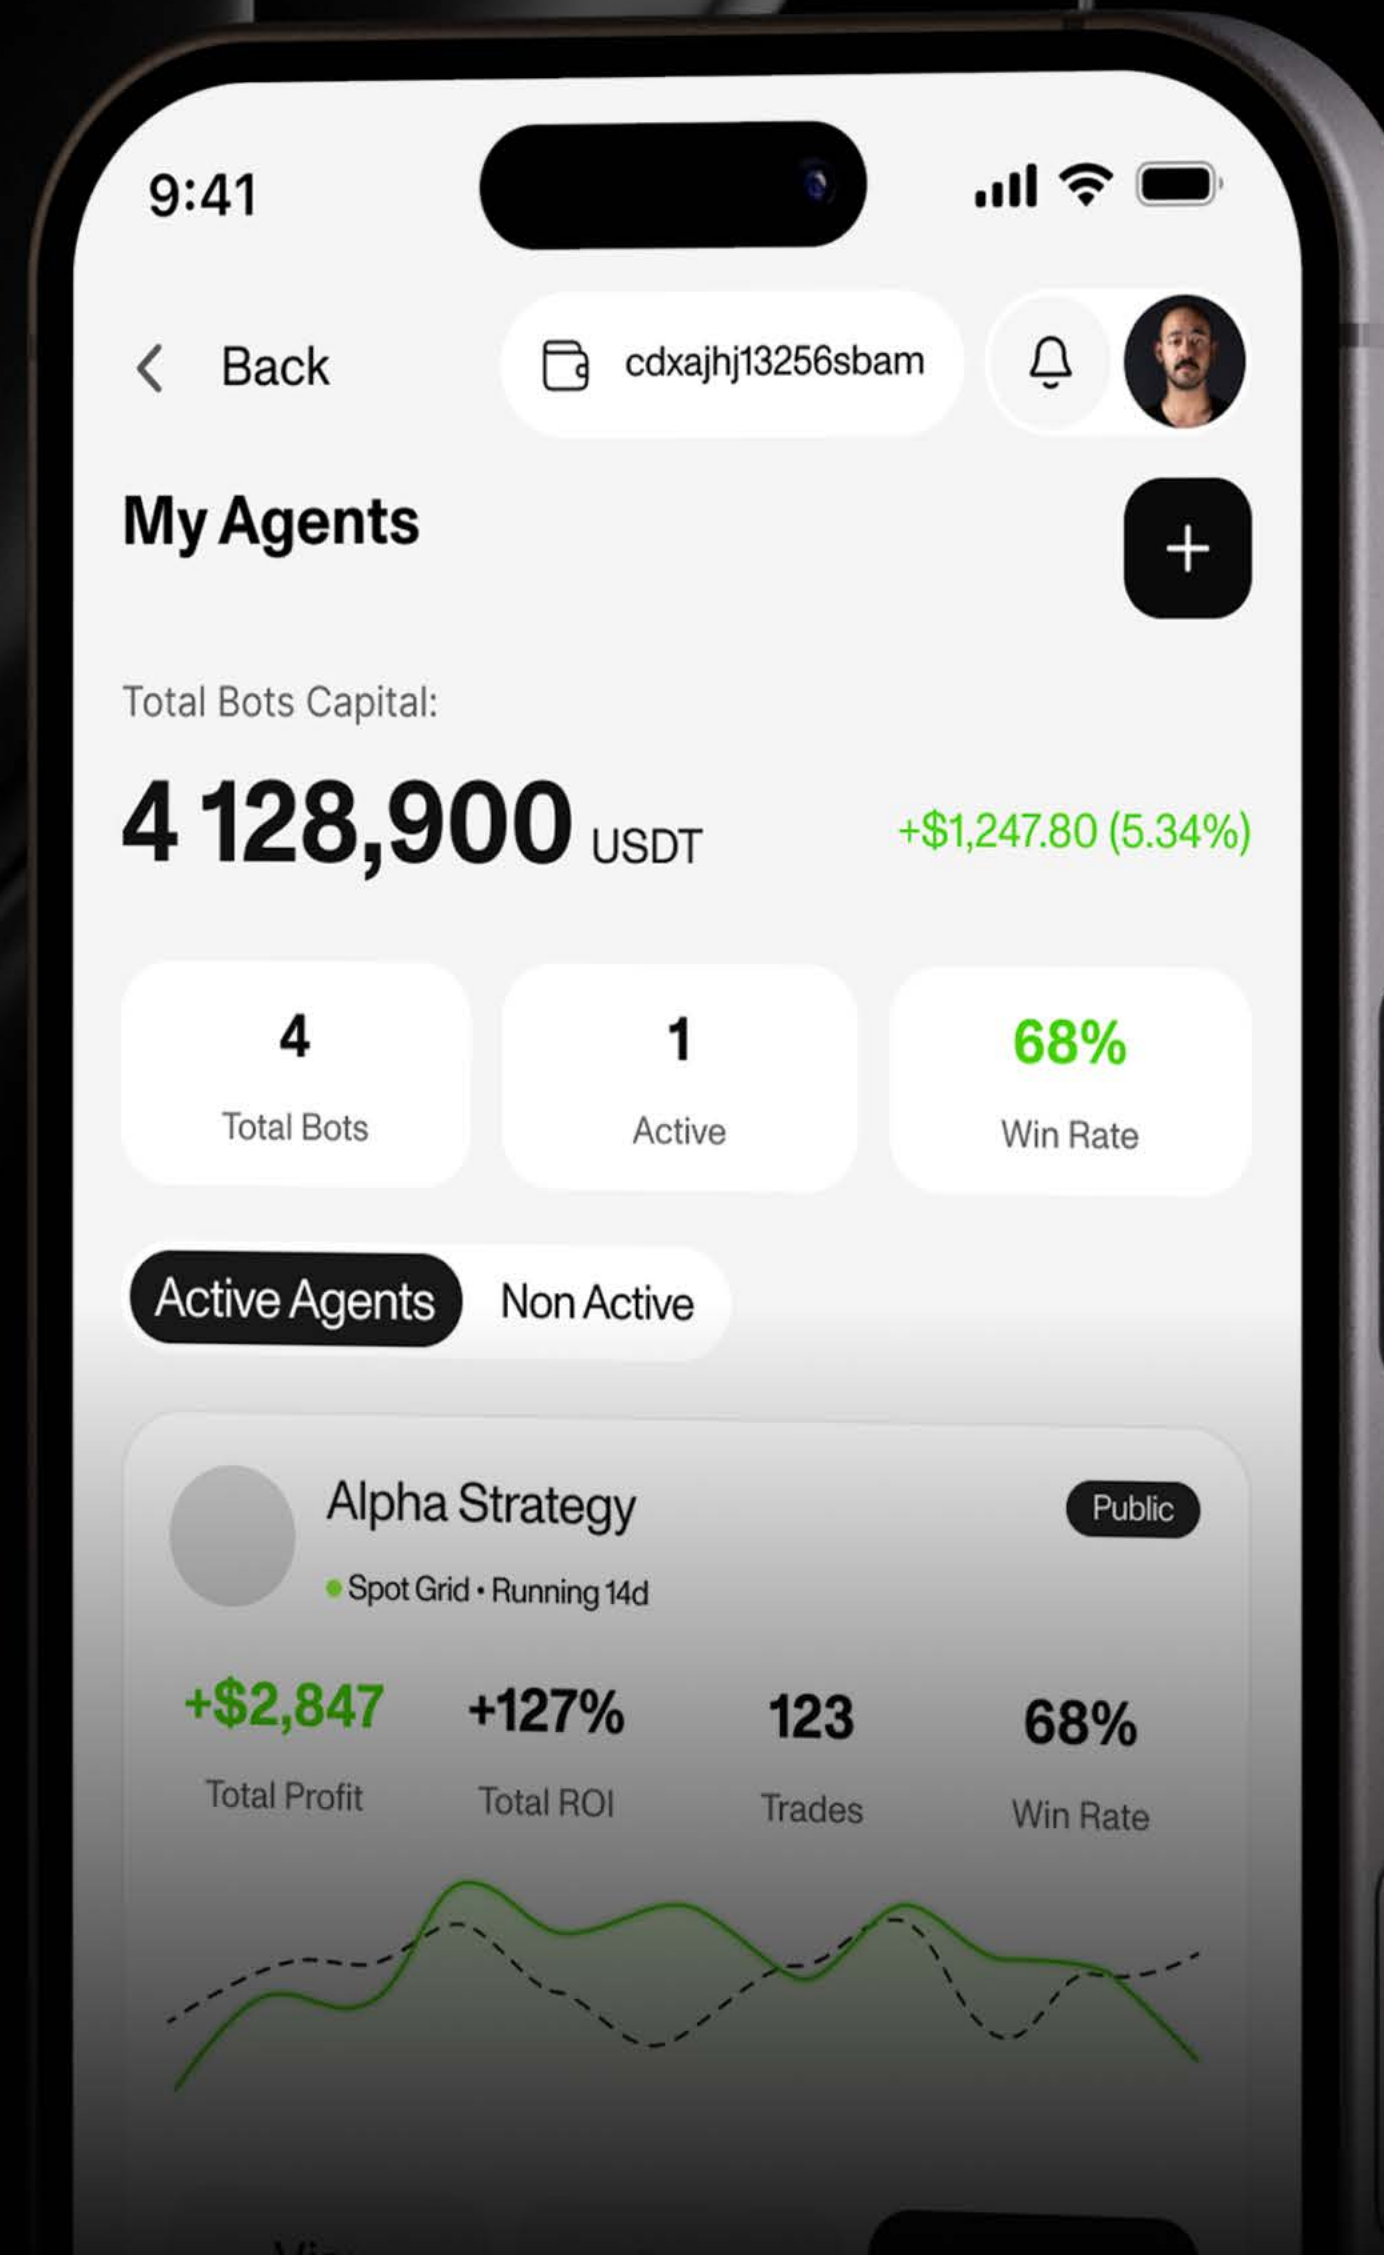

Full control over capital with execution handled at the protocol level.

Agent-driven execution

AI agents operate strategies within defined parameters, removing human bias.

On-chain transparency

Every action is executed and recorded within a structured blockchain environment.

24/7 disciplined performance

Continuous monitoring and execution without interruption or emotional deviation.

Personalized strategy control

Trading logic is defined by the user and executed within clearly set risk parameters.

System-level scalability

From manual trading to coordinated, agent-based execution across market conditions.

NEYRO launches in two phases

From limited beta access to a full agent platform rollout.

Phase 1 — Live Beta

- Live Beta is now active with access limited to early users
- The first live Neyro agent available in beta is Quantum Alpha.
- Users connect their wallet and copy this agent's trades in real time
- Trading is executed through a non-custodial smart-contract setup, funds remain under user control
- Quantum Alpha has been in live testing since 17 January 2026, with an average monthly result of 27.6% over the last 3 months.

Phase 2 — Full Platform (May–June)

- Launch of a full Neyro agent platform on top of the Aurum ecosystem
- Users will be able to create their own personalized trading agents aligned with their strategy and risk
- Leaderboards and public agent profiles to discover and copy multiple top-performing agents
- Management of public and private agents with advanced configuration and analytics

Quantum Alpha - First Neyro Agent Now Live in Beta

Limited Beta Access

Now available with limited access for early users

Smart-Contract-Integration — Einführung der ersten Phase

Users connect their wallet and activate the strategy via smart contract, initiating the first stage of Neyro's rollout.

Beta Conditions

- 0% performance fee during Beta
- 100% of generated profit remains with the user

Quantum Alpha Testing Results

- 17 Jan - 17 Feb: **22.6%**
- 17 Feb - 17 Mar: **28.9%**
- 17 Mar - 17 Apr: **31.4%**

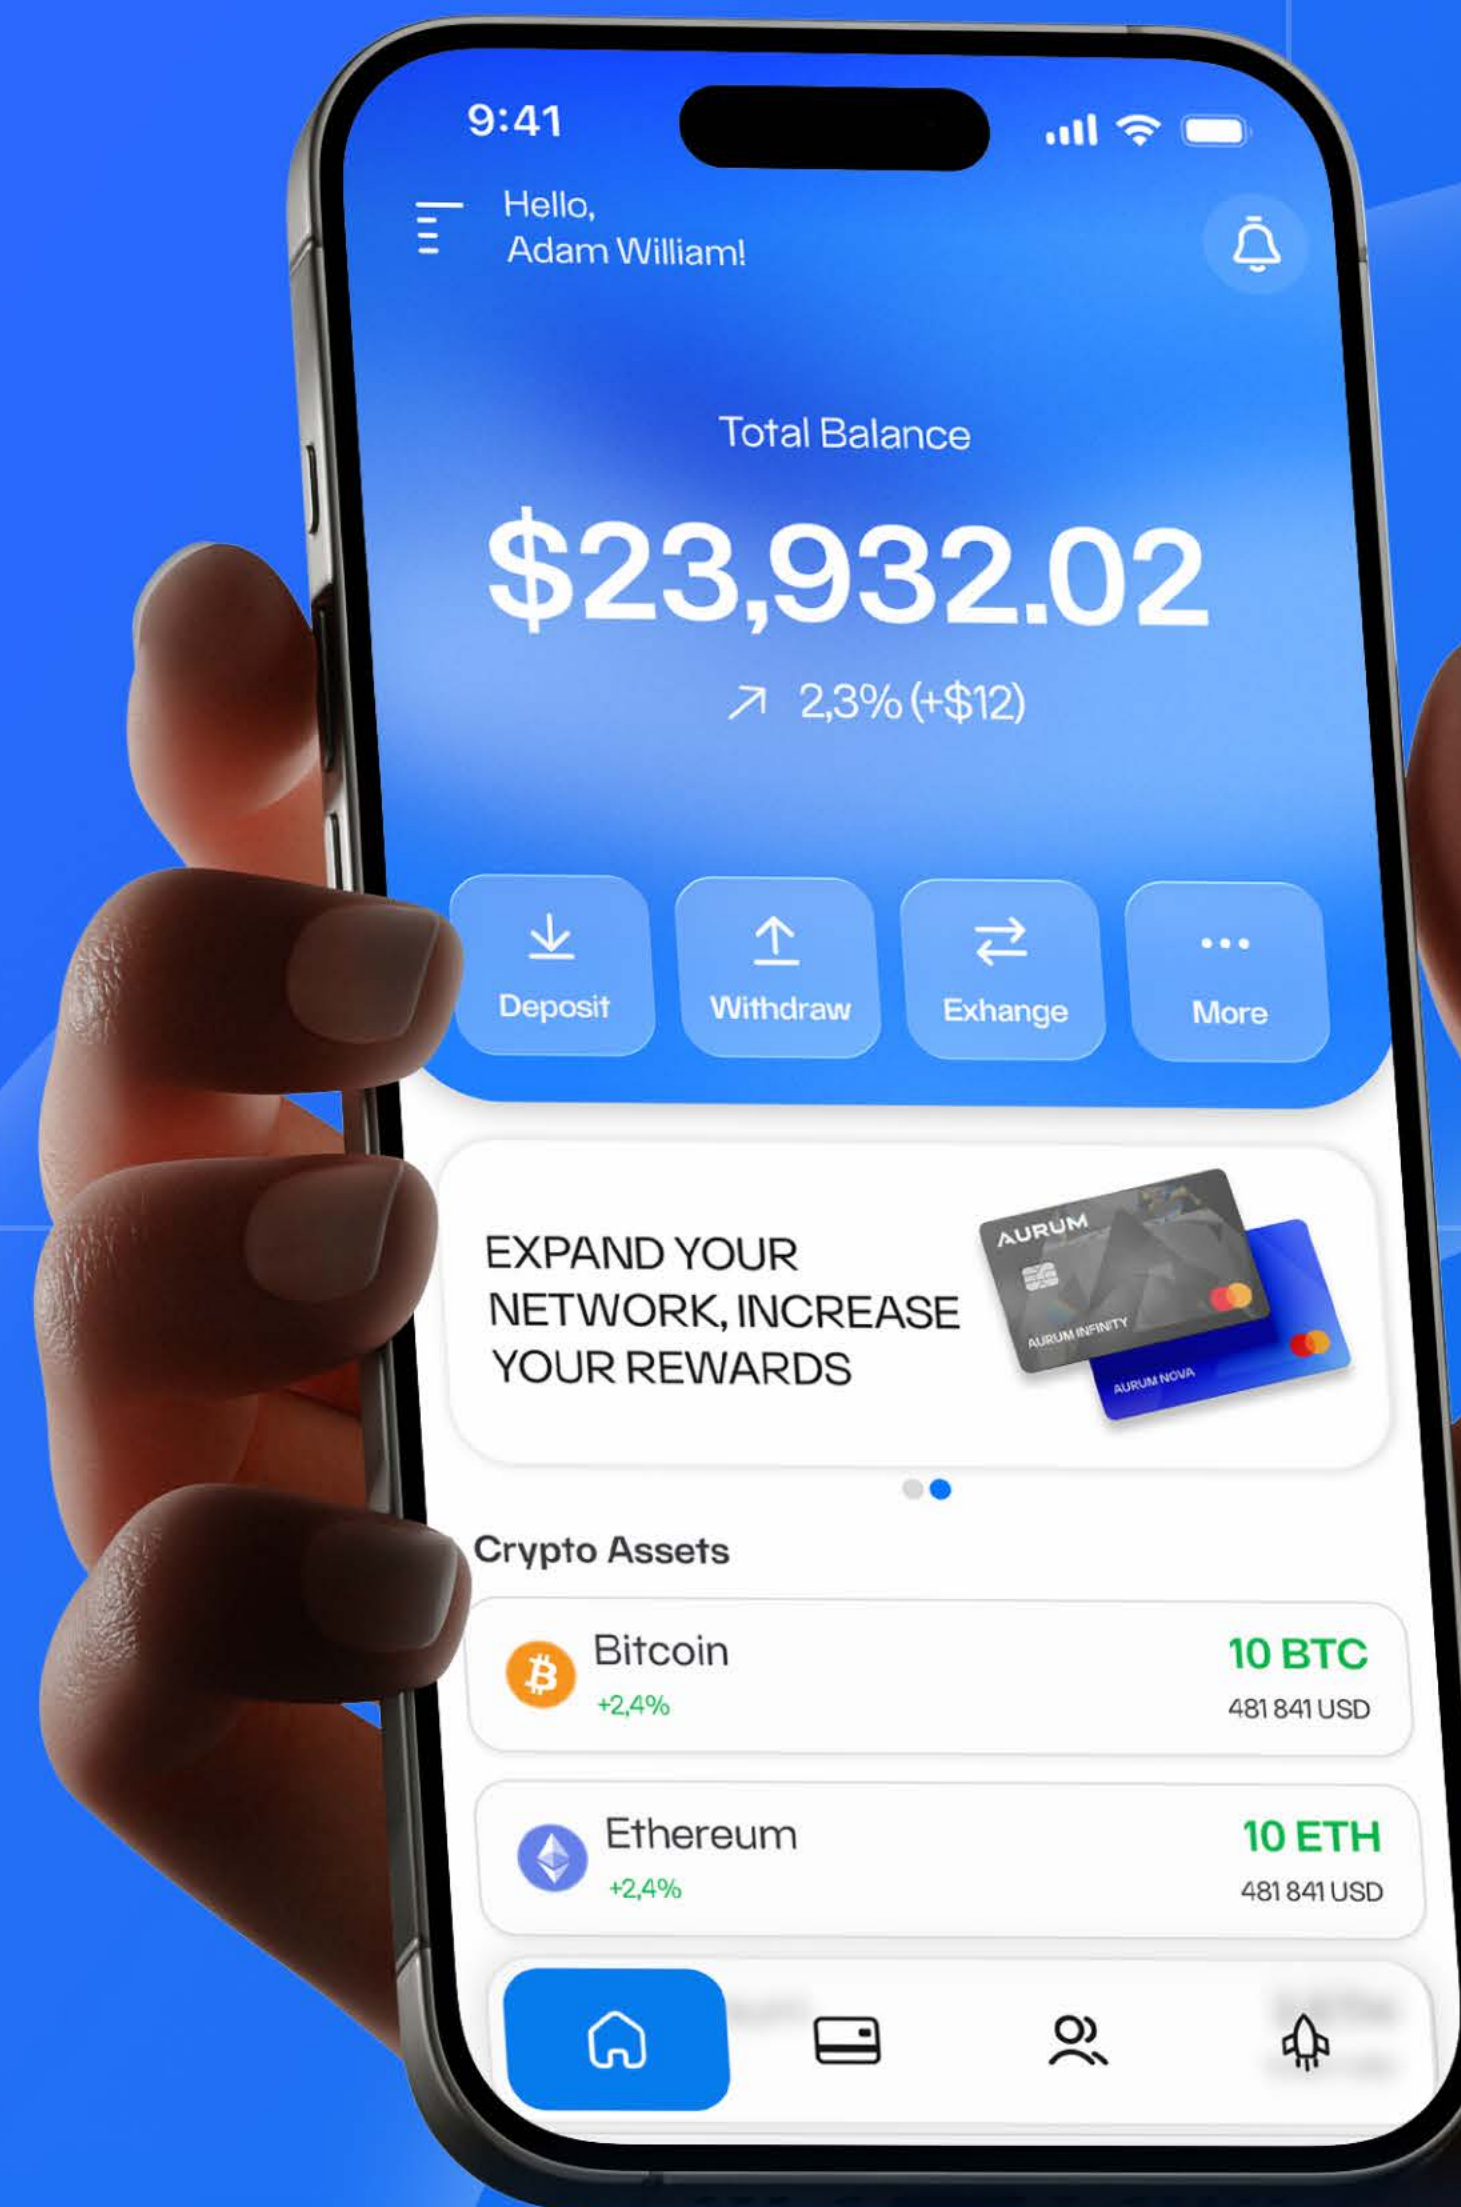

Neyro combines a non-custodial setup, a live trading agent, and structured on-chain execution in a single environment fully controlled by the user.

Aggressive Strategy • Derivatives Trading • High Volatility Assets

AURUM NeoBank – The Future of Digital Banking

AURUM NeoBank is a next-generation financial platform, designed to bridge traditional finance with digital assets.

Currently available via the **Telegram NeoBank interface**, **Android app on Google Play**, and now officially live on iOS through the App Store, AURUM NeoBank continues expanding into a fully operational global fintech platform.

TODAY, NEOBANK PROVIDES USERS WITH FULL CONTROL OVER KEY ECOSYSTEM FUNCTIONS, INCLUDING:

AI Bots management

EX-AI PRO and Zeus AI Bot activation, configuration, and performance control.

Wallet balances

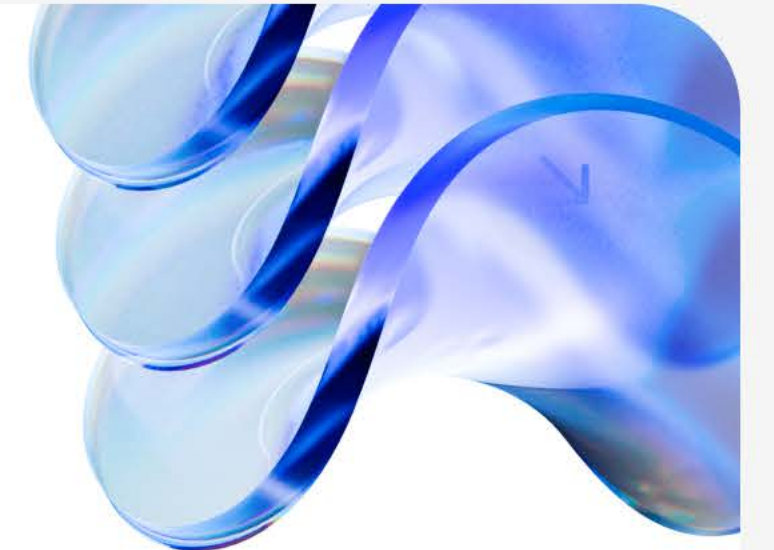

Balance overview, fund transfers, and transaction history tracking.

AURUM Cards

Activation, top-up, and global use of physical and virtual cards.

Partner Team

Team performance analytics and withdrawal of Zeus AI Bot commissions.

Live trading results

Monitoring real-time performance and withdrawing profits.

AURUM CARD KEY ADVANTAGES:

Instant Access to Funds

Withdraw and spend crypto as cash — anytime, anywhere, directly from your AURUM Card.

Smart Payment Integration

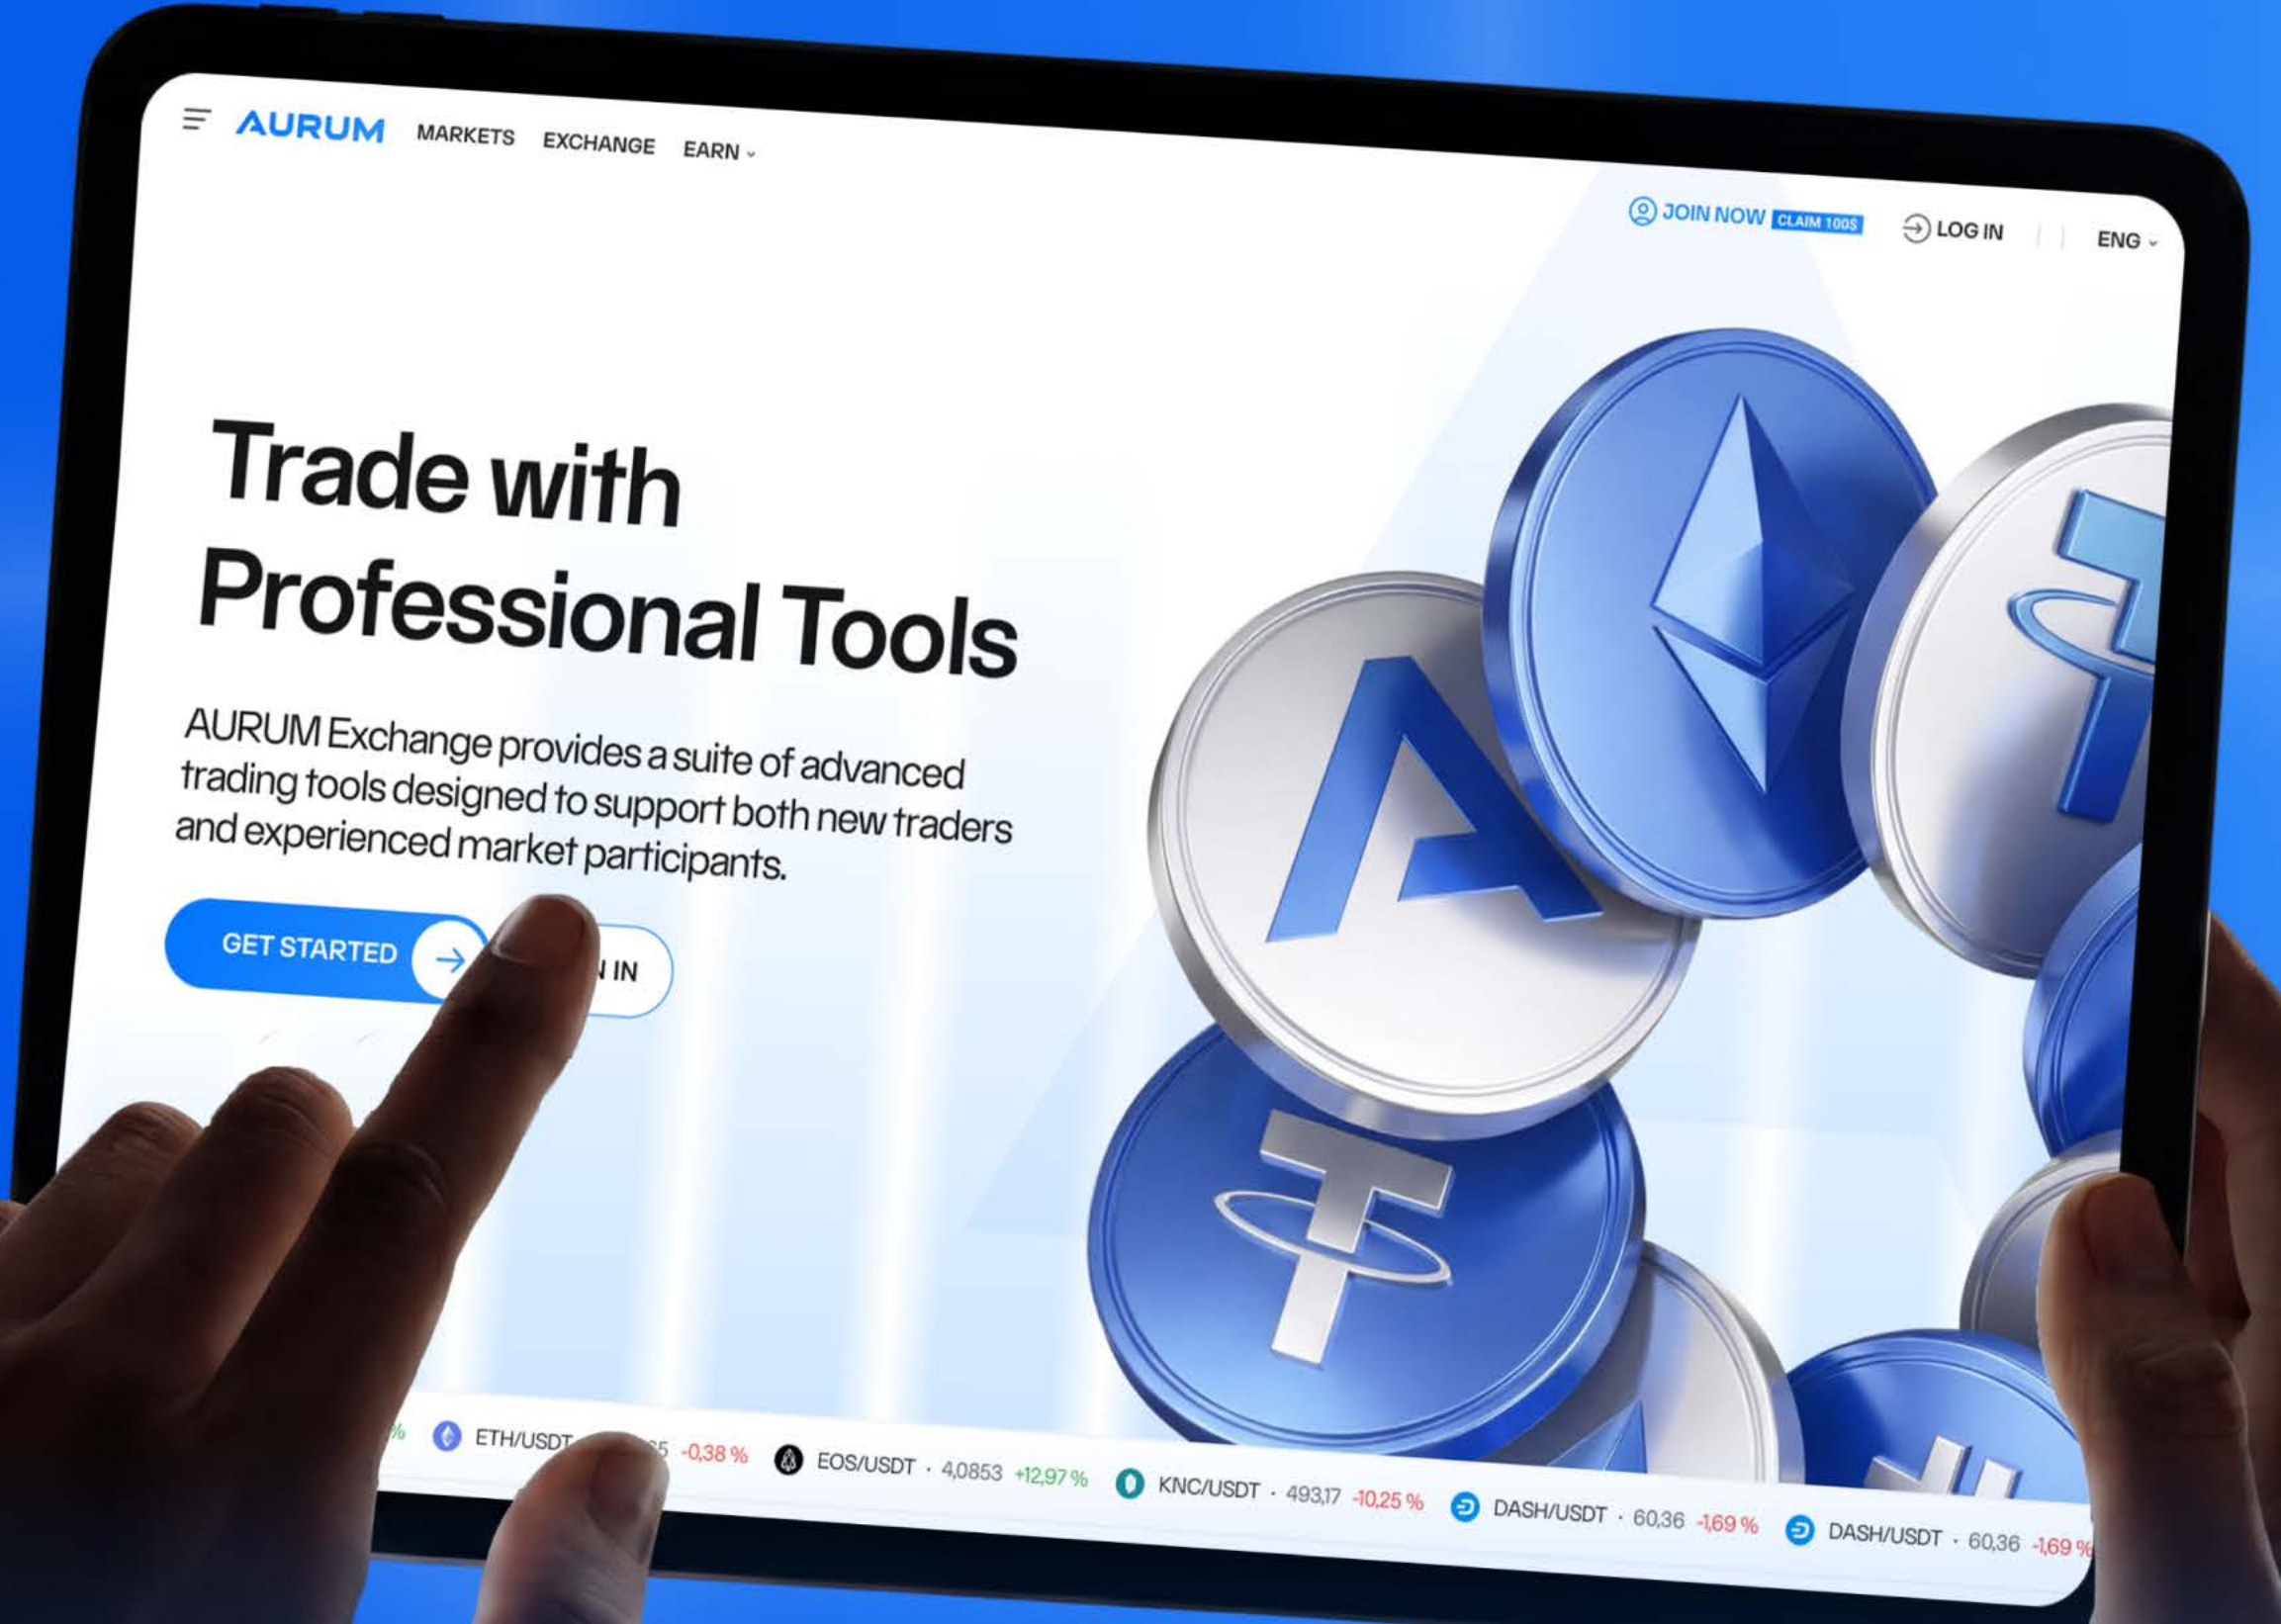

Supports Apple Pay and Google Pay for seamless contactless payments — online or offline.

Fully Connected with NeoBank

Manage your AURUM Card, track balances, and control transactions within the NeoBank interface.

High Limits & Full Flexibility

Spend up to 100,000 USDT per month with low fees and no hidden restrictions.

Aurum Exchange

A **decentralized perpetual** trading platform built for high-performance execution **on Polygon**. Built on **Polygon**, it delivers fast on-chain execution and **deep liquidity** for high-performance trading.

Built for professional traders and DeFi-native users, the platform provides a high-performance environment for derivatives trading.

It combines oracle-based pricing, fast on-chain execution, and a structured trading system designed for capital efficiency.

THE CORE OF THE **AURUM ECOSYSTEM**

AURUM Exchange is the financial engine that drives growth across the entire AURUM infrastructure. It ensures liquidity, capital flow, and scalability for every connected product:

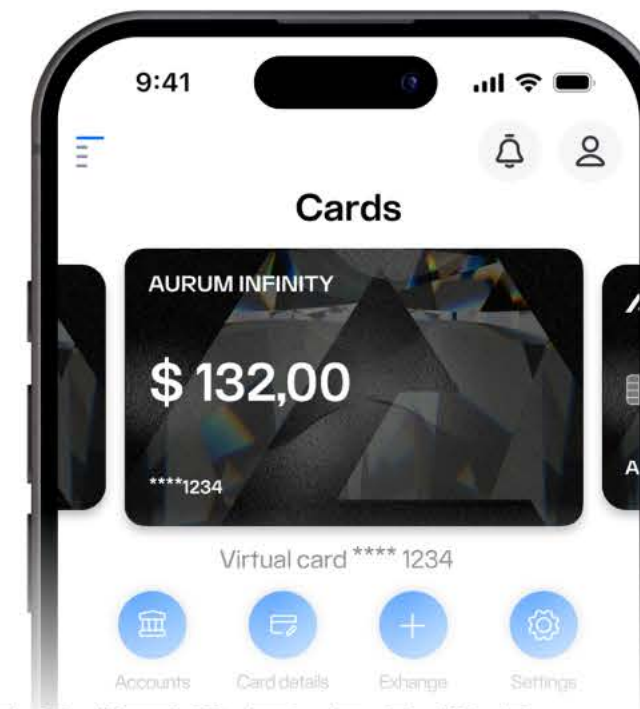

01

AURUM CARDS

instant funding and global payments.

02

AURUM NEOBANK

seamless on/off ramps and account services

03

AI BOTS

direct integration with trading and liquidity pools

By combining the scale of a global exchange with ecosystem-level integration, **AURUM establishes one of the most complete infrastructures in digital finance** — built for long-term adoption and sustainability.

KEY FUNCTIONS OF AURUM EXCHANGE

AURUM Exchange includes a full suite of live trading tools and real-time systems built for high performance and global scalability.

Long & Short

capture both sides of the market.

Perpetuals

no expiry dates, continuous market exposure.

Limit Orders

execute at predefined price levels.

Stop Loss

protect downside risk through automated exits.

Take Profit

secure gains through predefined target execution.

Trade Perpetuals. Zero Slippage.

The next evolution in decentralized derivatives trading — with up to **100x leverage**, fast execution, and professional-grade **trading on Polygon**.

Flexible Staking — stability meets intelligence

In global finance, Flexible Staking is considered one of the most stable and transparent forms of digital income. AURUM now integrates this mechanism into its ecosystem — combining blockchain-level reliability with AI-powered optimization.

RWA

A Smarter Way to **Grow**
and **Protect** Your **Wealth**

AURUM RWA is developed as a standalone **investment direction** focused on real-world assets and **long-term capital** management.

The **first asset** introduced within the RWA framework is **gold** — a globally **established** store of value used for capital preservation across **economic** cycles.

The **investment** model

AURUM **RWA GOLD** combines gold-backed assets with an **AI-driven** income layer, creating a **two-layer model** for capital preservation and yield **generation**.

50%

Discounted Gold Allocation

Half of the **capital is allocated to gold** at the market price on the day of purchase. A **30% structural discount** is applied within the product structure, increasing the effective **gold allocation associated** with the package.

50%

AI-Driven Yield Execution (XAUT/USDC)

Half of the capital is deployed into the **XAUT/USDC trading pair**, where controlled AI execution targets **7-10% structured yield** depending on market conditions.

Discounted Gold Allocation

Half of the **investment** is **allocated to gold** at the current market price on the day of purchase, allowing the client to enter the gold **position based on real-time market conditions**.

Through the **product structure**, a **30% structural discount** is applied to the **gold allocation**, increasing the effective amount of **gold associated** with the package.

After 12 months, clients may choose to **receive their gold allocation** in **physical gold** or **in tokenized gold**, subject to the product terms and **delivery conditions**.

AI-Driven Yield Execution (XAUT/USDC)

The active income component of the AURUM RWA model operates through the XAUT/USDC trading pair, where AI-powered execution manages trades in the tokenized gold market.

Targeted Yield Range

The strategy targets 7-10% structured monthly yield, depending on market conditions, volatility, and liquidity within the tokenized gold market.

Strategy Testing Results

The trading model has been tested for over 4 months, generating over 35% cumulative return during the testing phase.

Active Income Layer

Within the RWA structure, 50% of investor capital is allocated to this AI-driven trading strategy, forming the active yield generation component.

AI Trading Execution

AI-driven algorithms continuously analyze market data and execute trades within the XAUT/USDC trading pair, optimizing entries and exits in real time.

AURUM EX-AI BOT

The Aurum EX-AI Bot is an advanced, fully autonomous trading system designed to maximize profitability in the cryptocurrency market. Leveraging AI to analyze real-time data, it operates 24/7 to make strategic, low-risk spot trades on your behalf.

Automated Performance:

Once you activate the bot, it manages trades autonomously, aiming to maximize potential gains while minimizing risks.

Multi-Pair Trading:

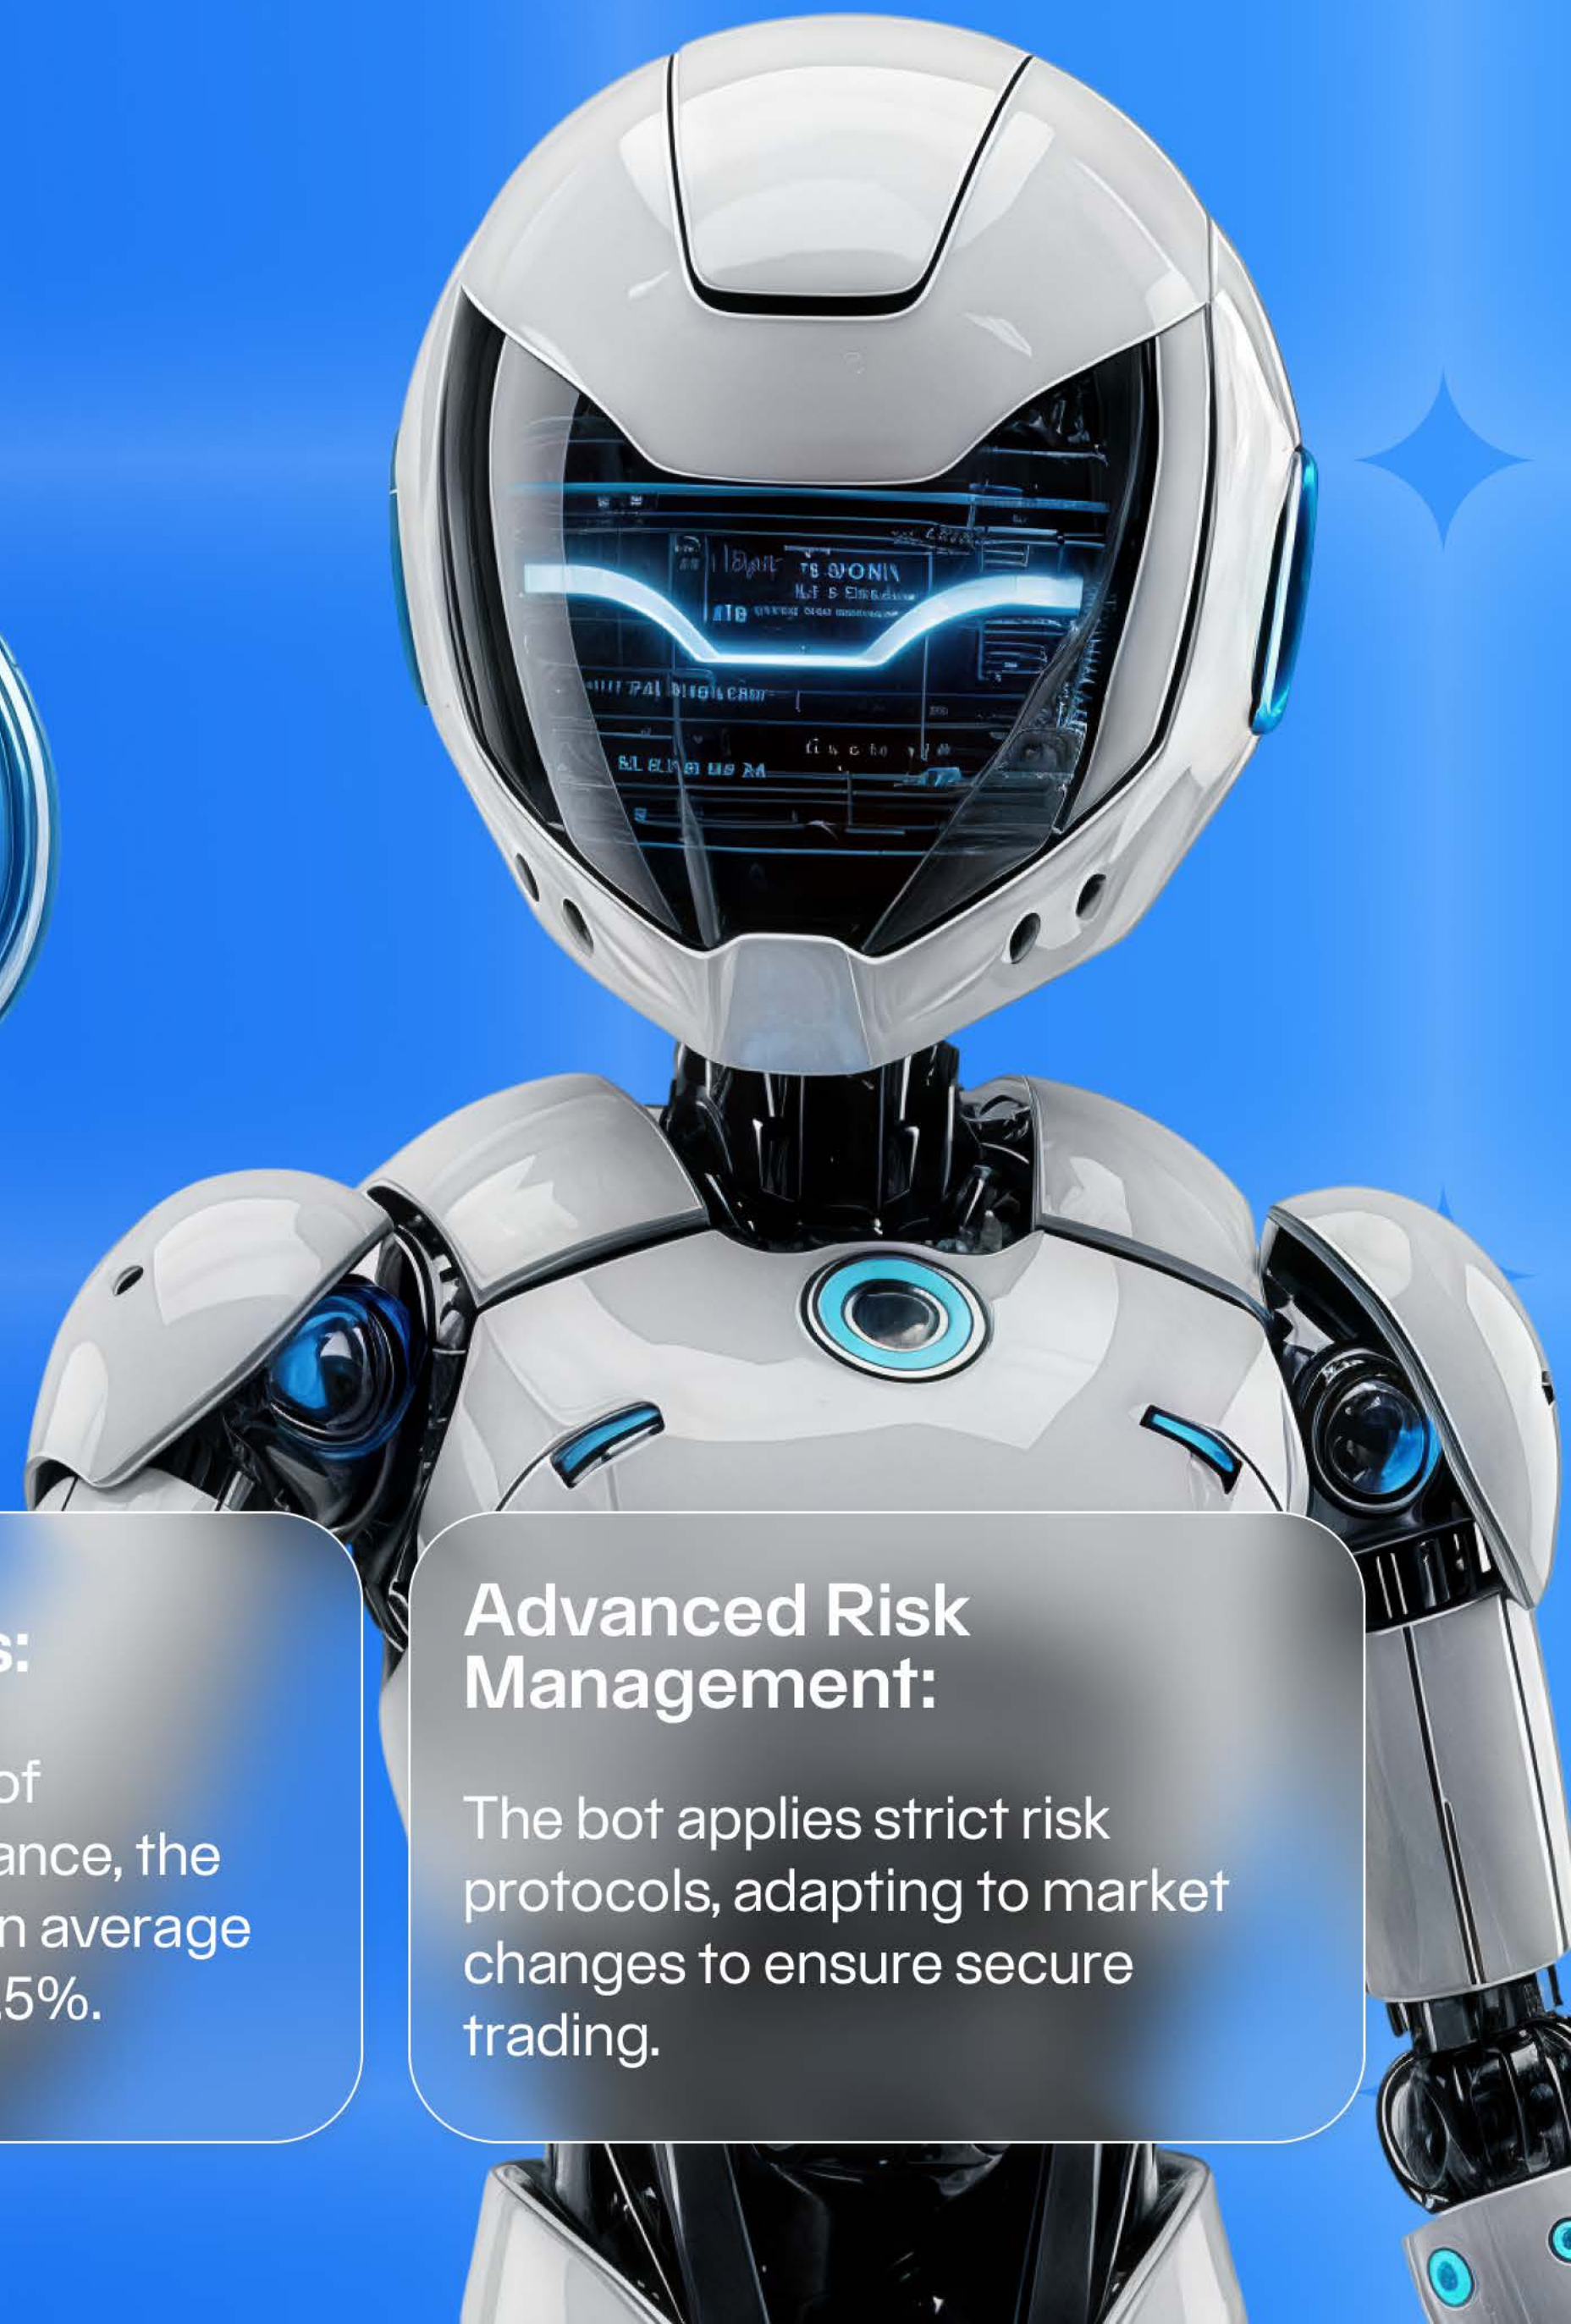

The bot trades across multiple pairs, optimizing strategies for maximum profit.

Proven Returns:

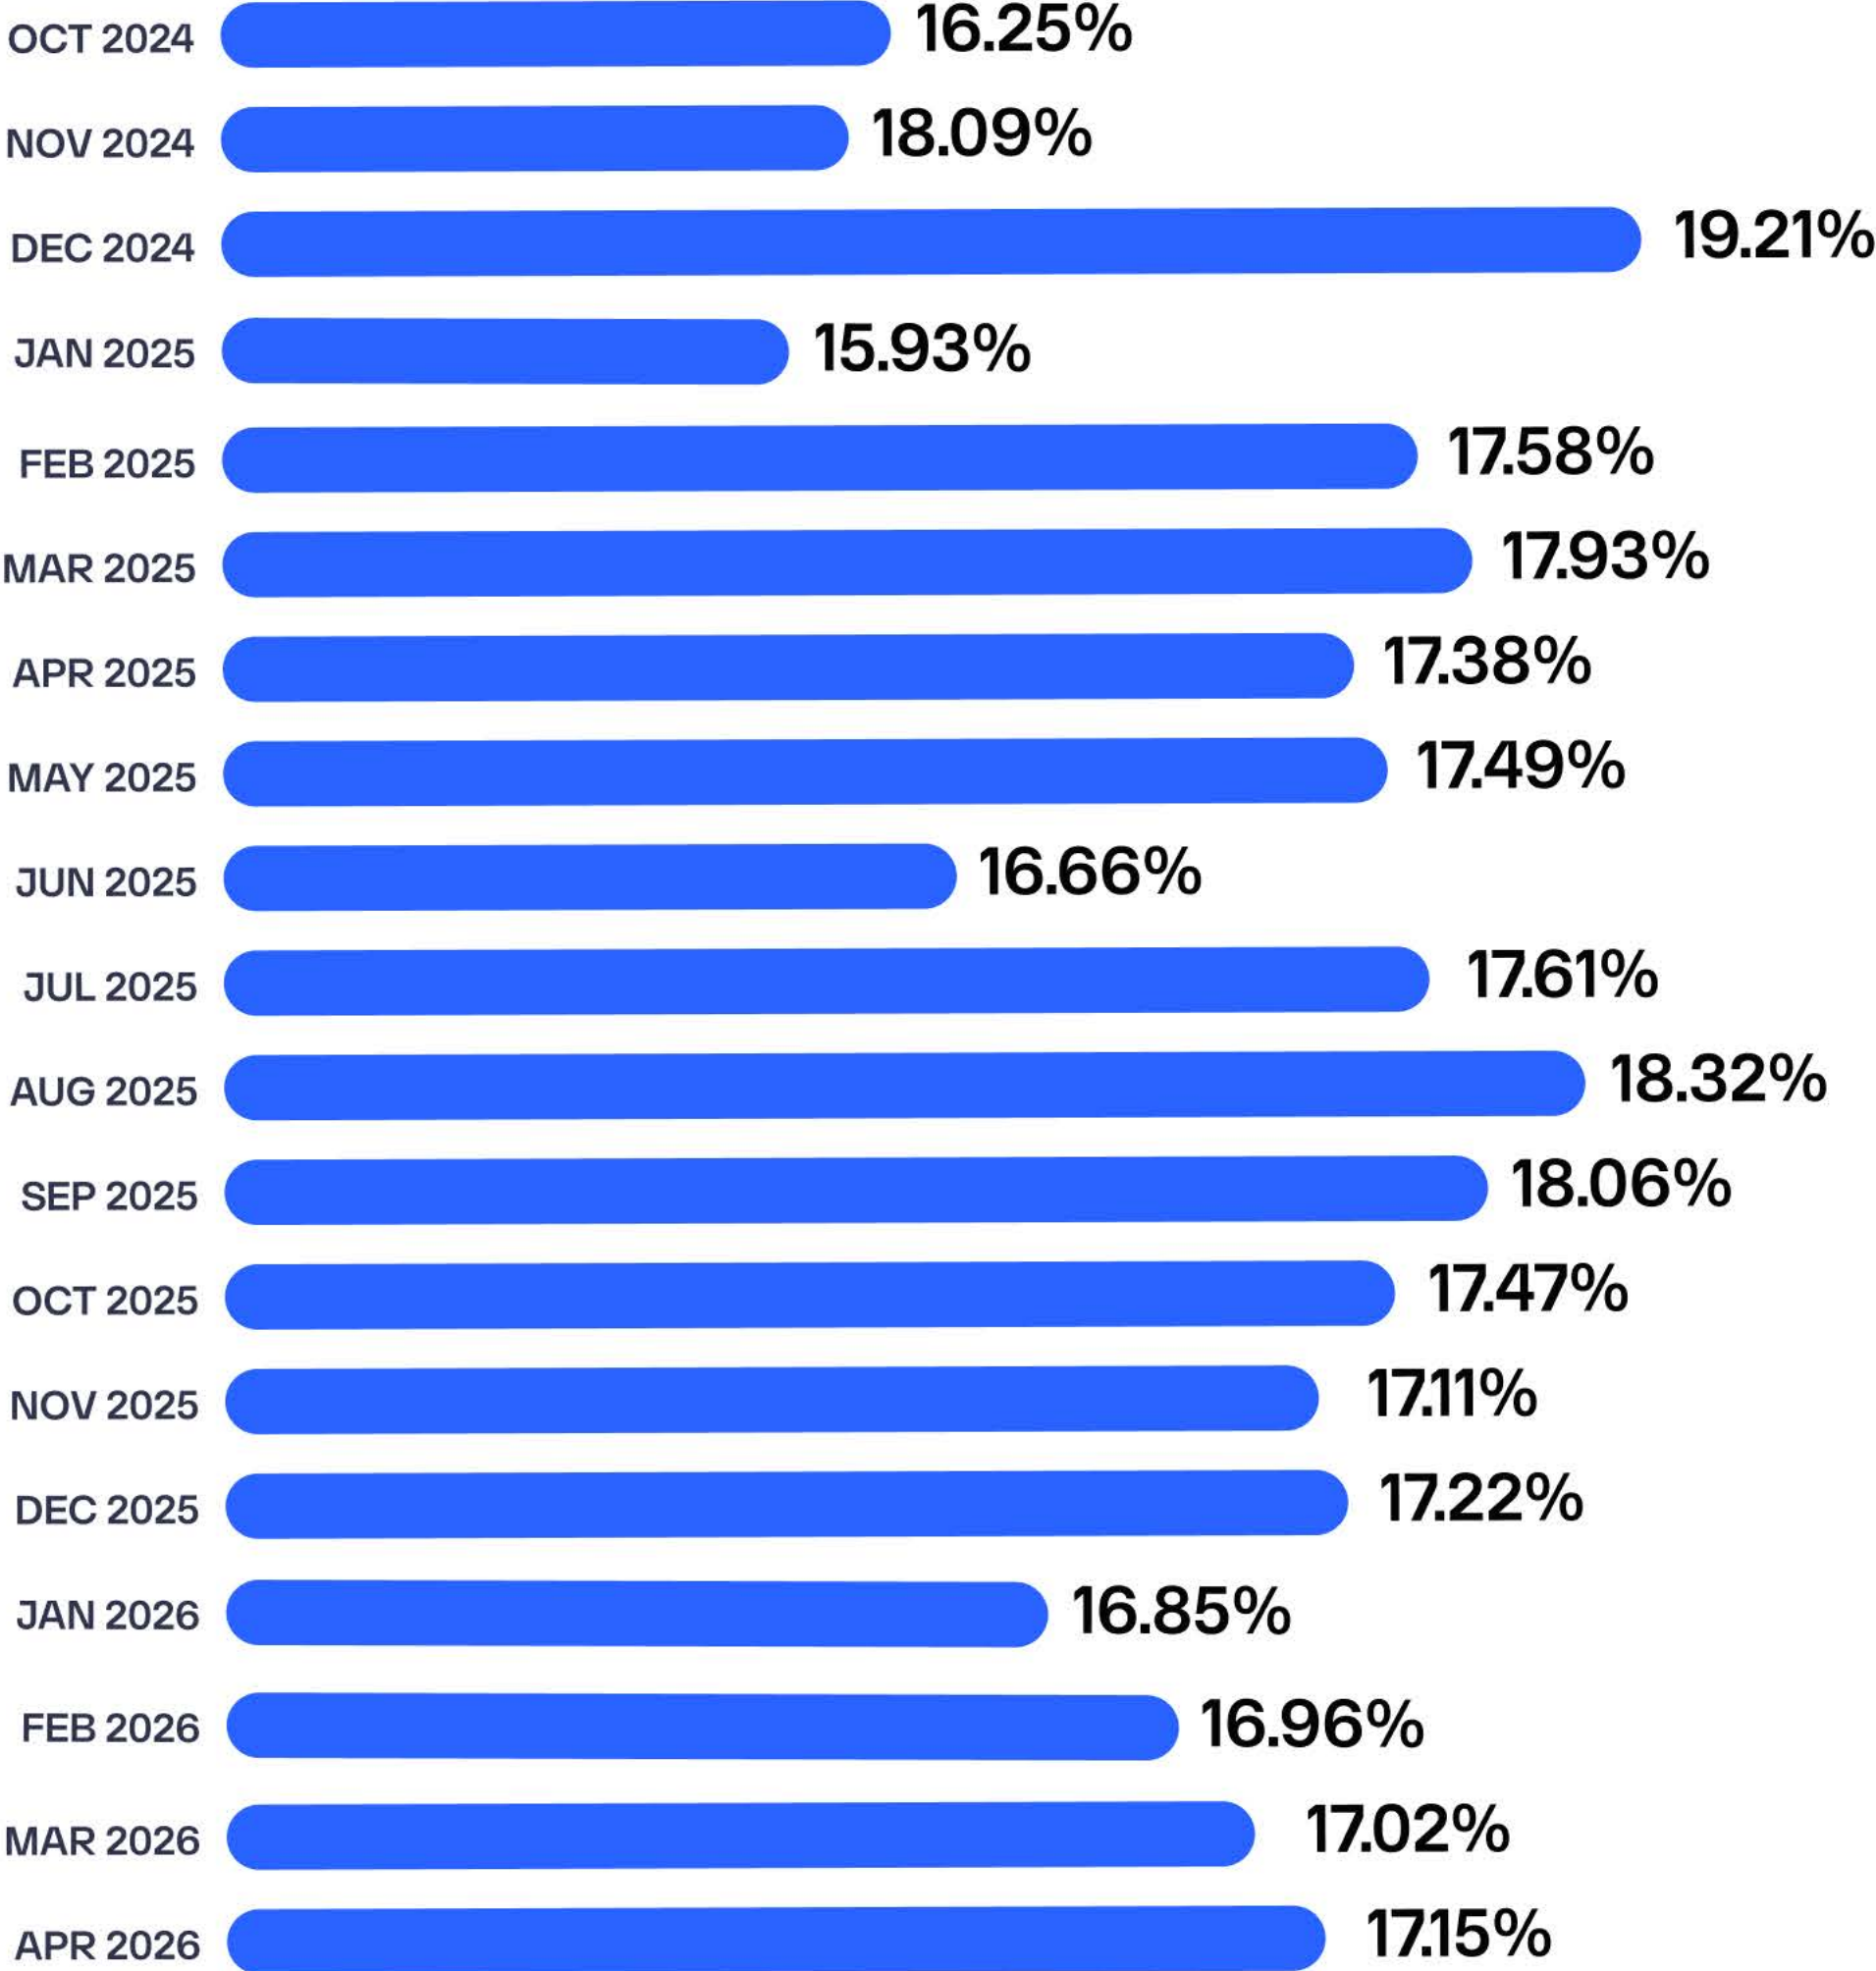

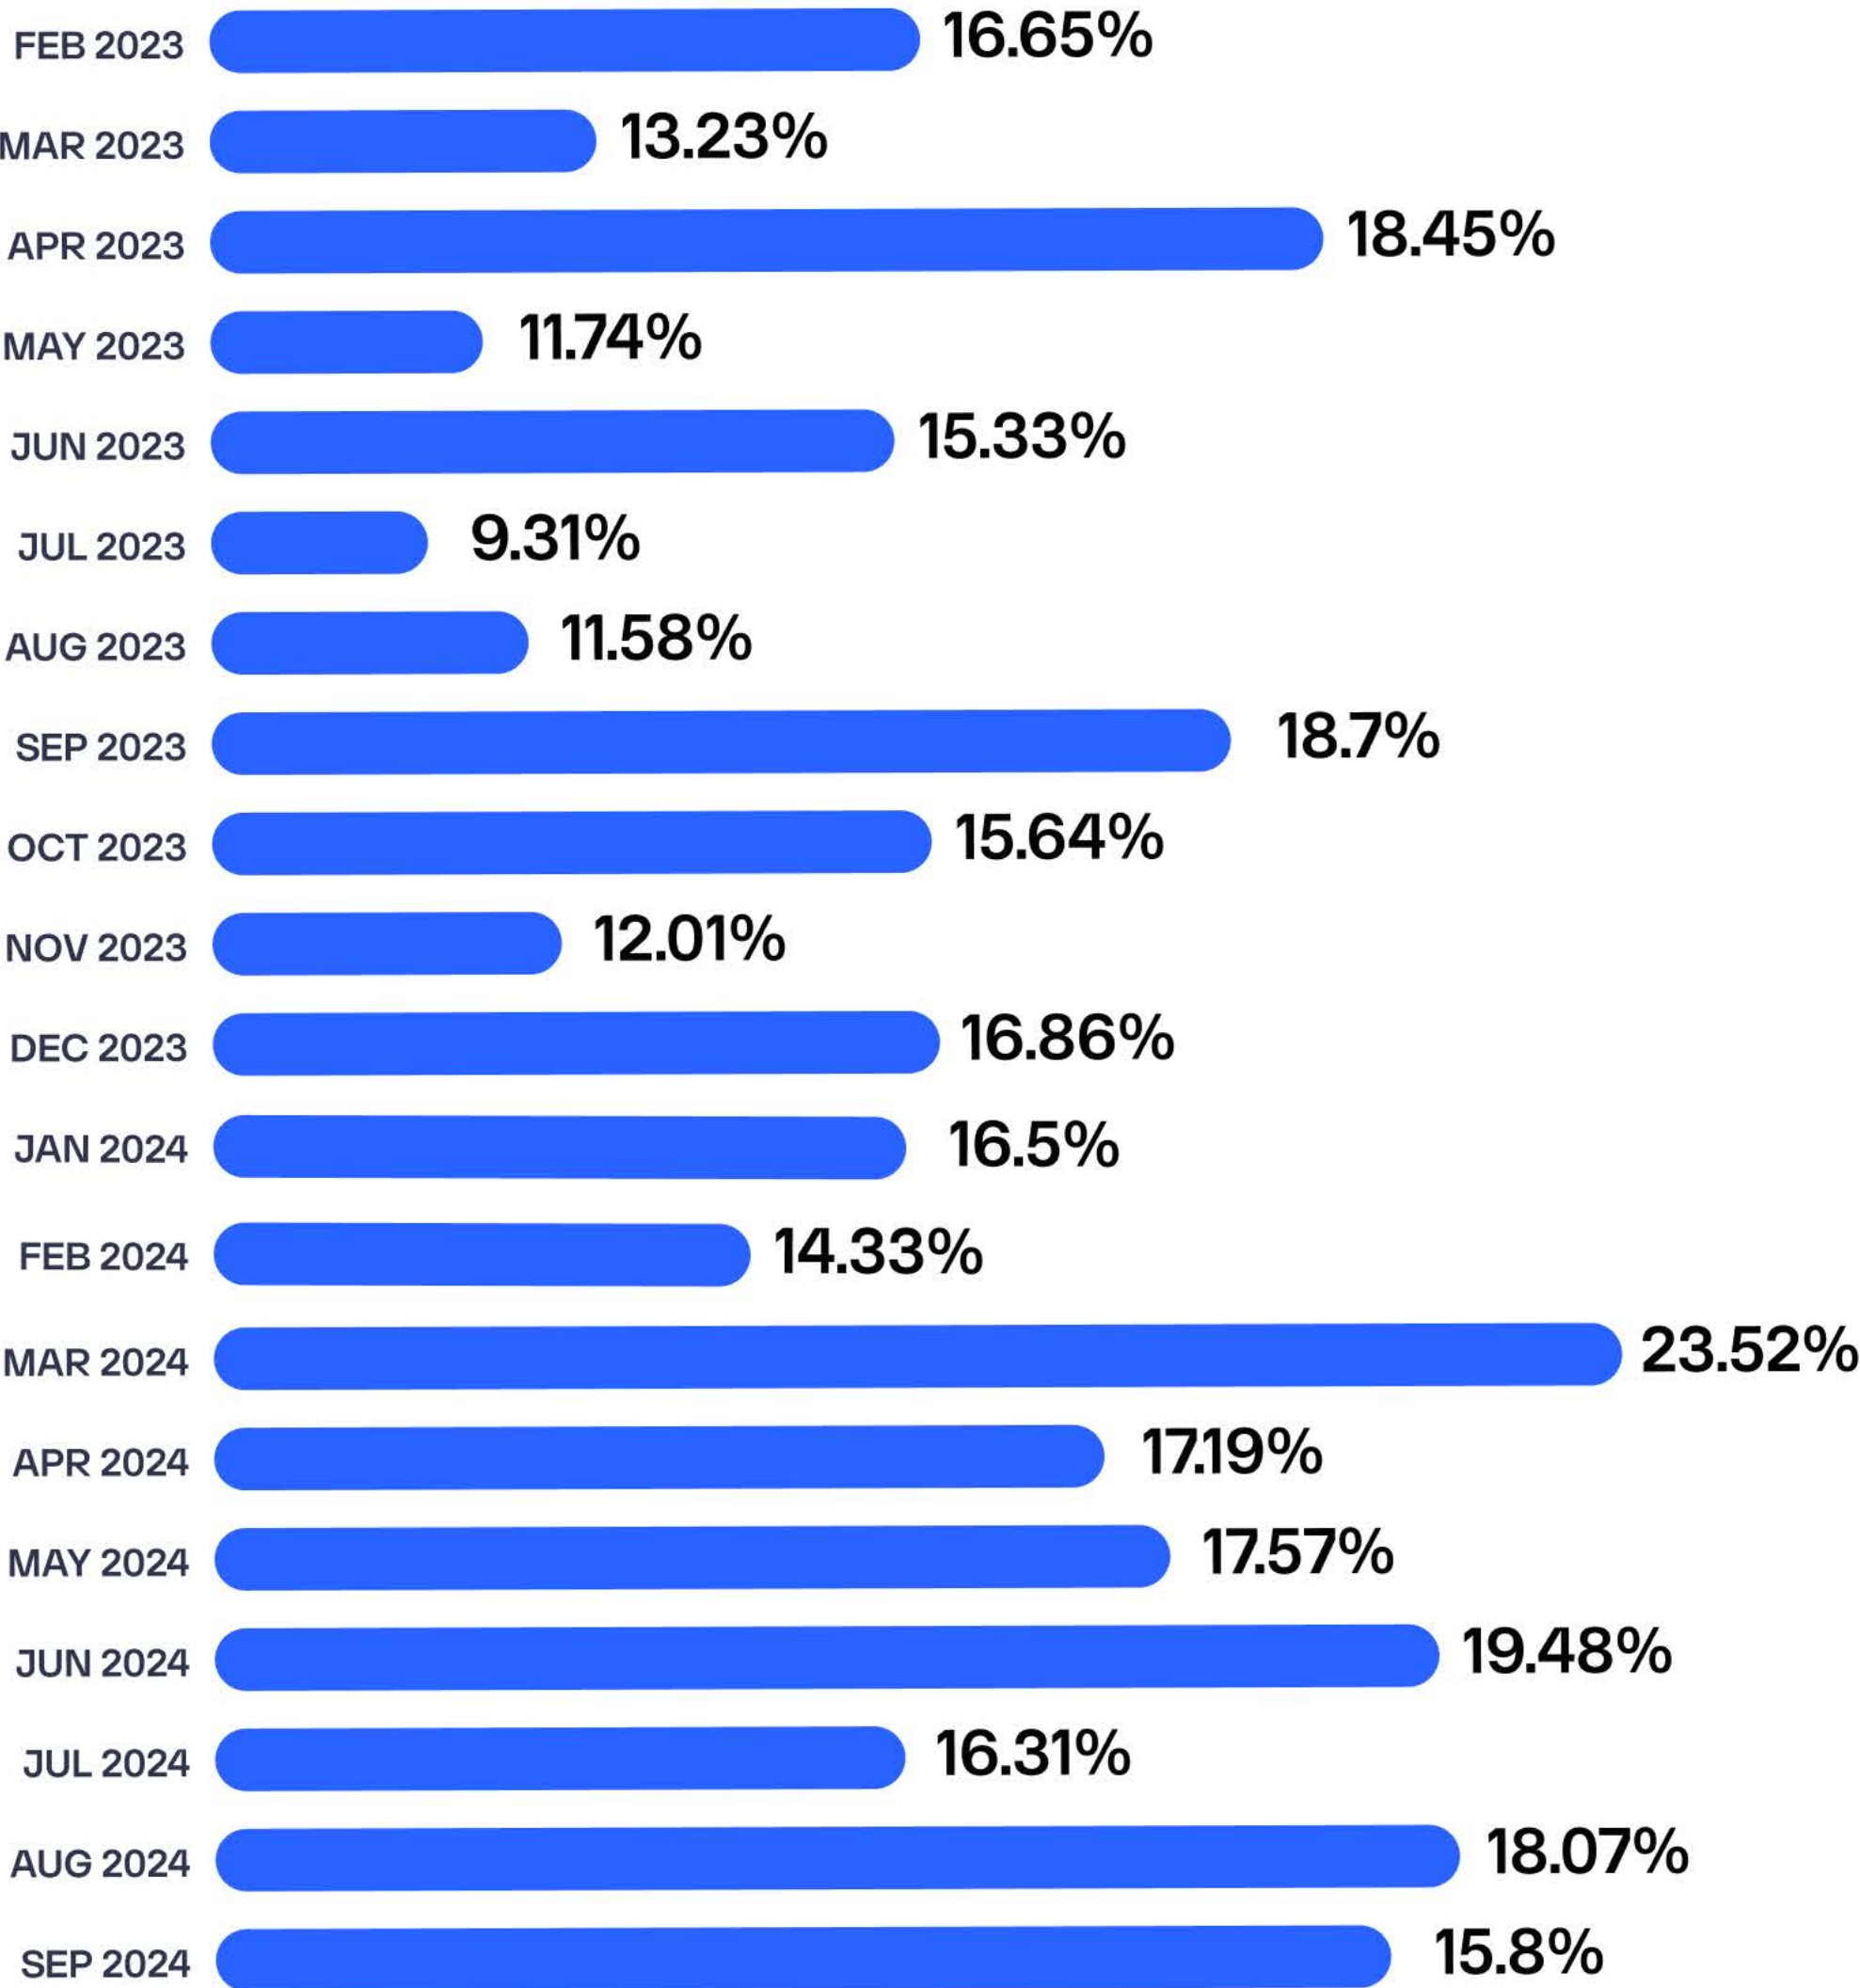

With over 2,5 years of consistent performance, the bot demonstrates an average monthly return of 17.5%.

Advanced Risk Management:

The bot applies strict risk protocols, adapting to market changes to ensure secure trading.

- ✓ The principal amount of the EX-AI Bot is available for withdrawal on the 1st, 10th, and 20th of each month with a withdrawal fee of 35% and is transferred to your wallet within 7 working days. **After one year, there will be no withdrawal fee for the principal amount.**
- ✓ The minimum amount required to request a **withdrawal is 25 USDT.**
- ✓ Each new reinvestment or top-up added to the deposit **starts its own 365-day** period before early-withdrawal fees no longer apply.

INTRODUCING AURUM EX-AI PRO BOT.

your advanced trading solution — created exclusively for active EX-AI users who want more control, more flexibility, and more results.

Advanced trading engine

Upgraded version of the flagship EX-AI Bot with extended control and performance tools.

Full real-time transparency

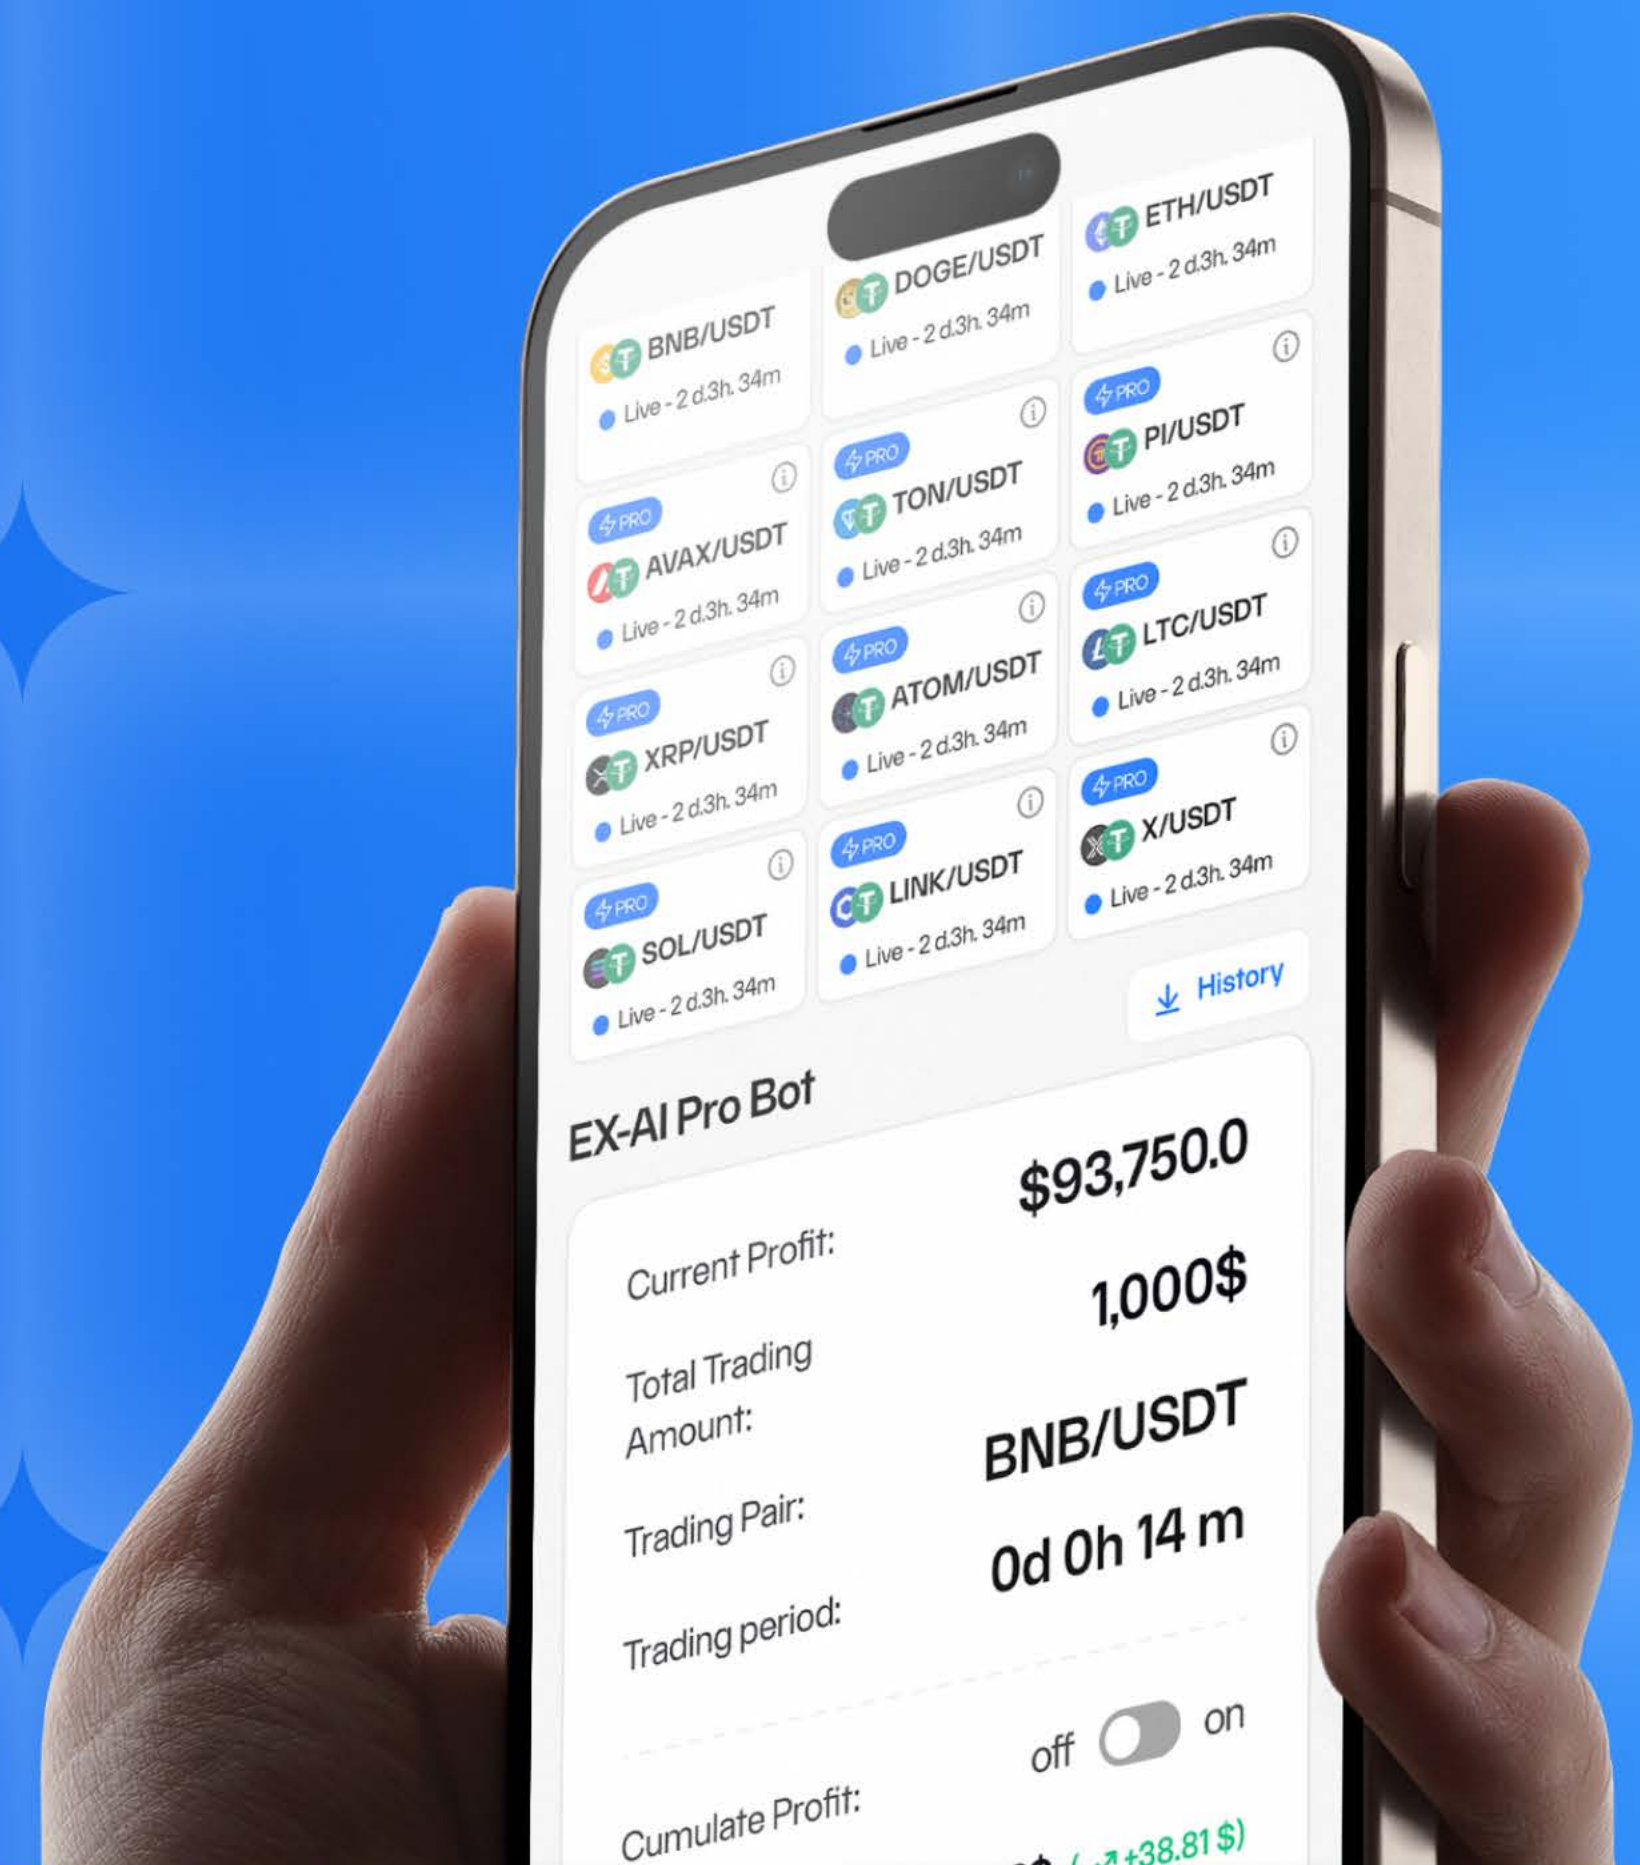

Every trade visible in real time within the secure AURUM infrastructure.

Adaptive management

Adjust, monitor, and optimize strategies anytime — without technical complexity.

Pro-level experience

Designed for those ready to go beyond automation and stay connected every second.

KEY FEATURES & BENEFITS EX-AI PRO BOT

Flexible deposits

allocate any amount up to your current EX-AI deposit

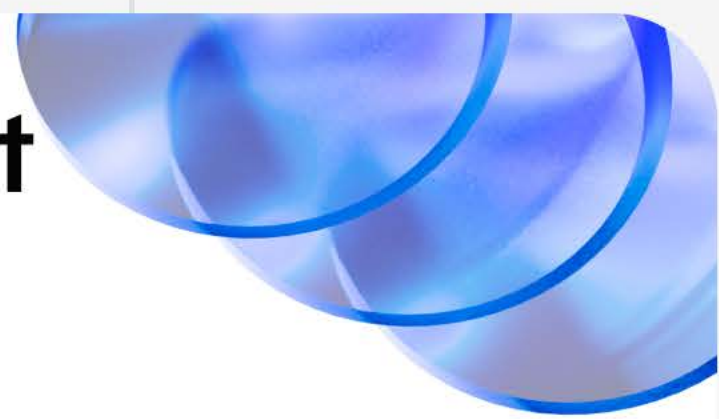

Withdraw anytime

No lock-up on the principal — funds remain fully accessible.

Up to 10% monthly return

Powered by the same AI-driven performance engine ensuring stable growth.

Minimum entry amount

Start from just 100 USDT under the unified AURUM system terms.

EX-AI PRO ACCESS RULES & LIMITS

Available exclusively for active EX-AI users

Active EX-AI Required

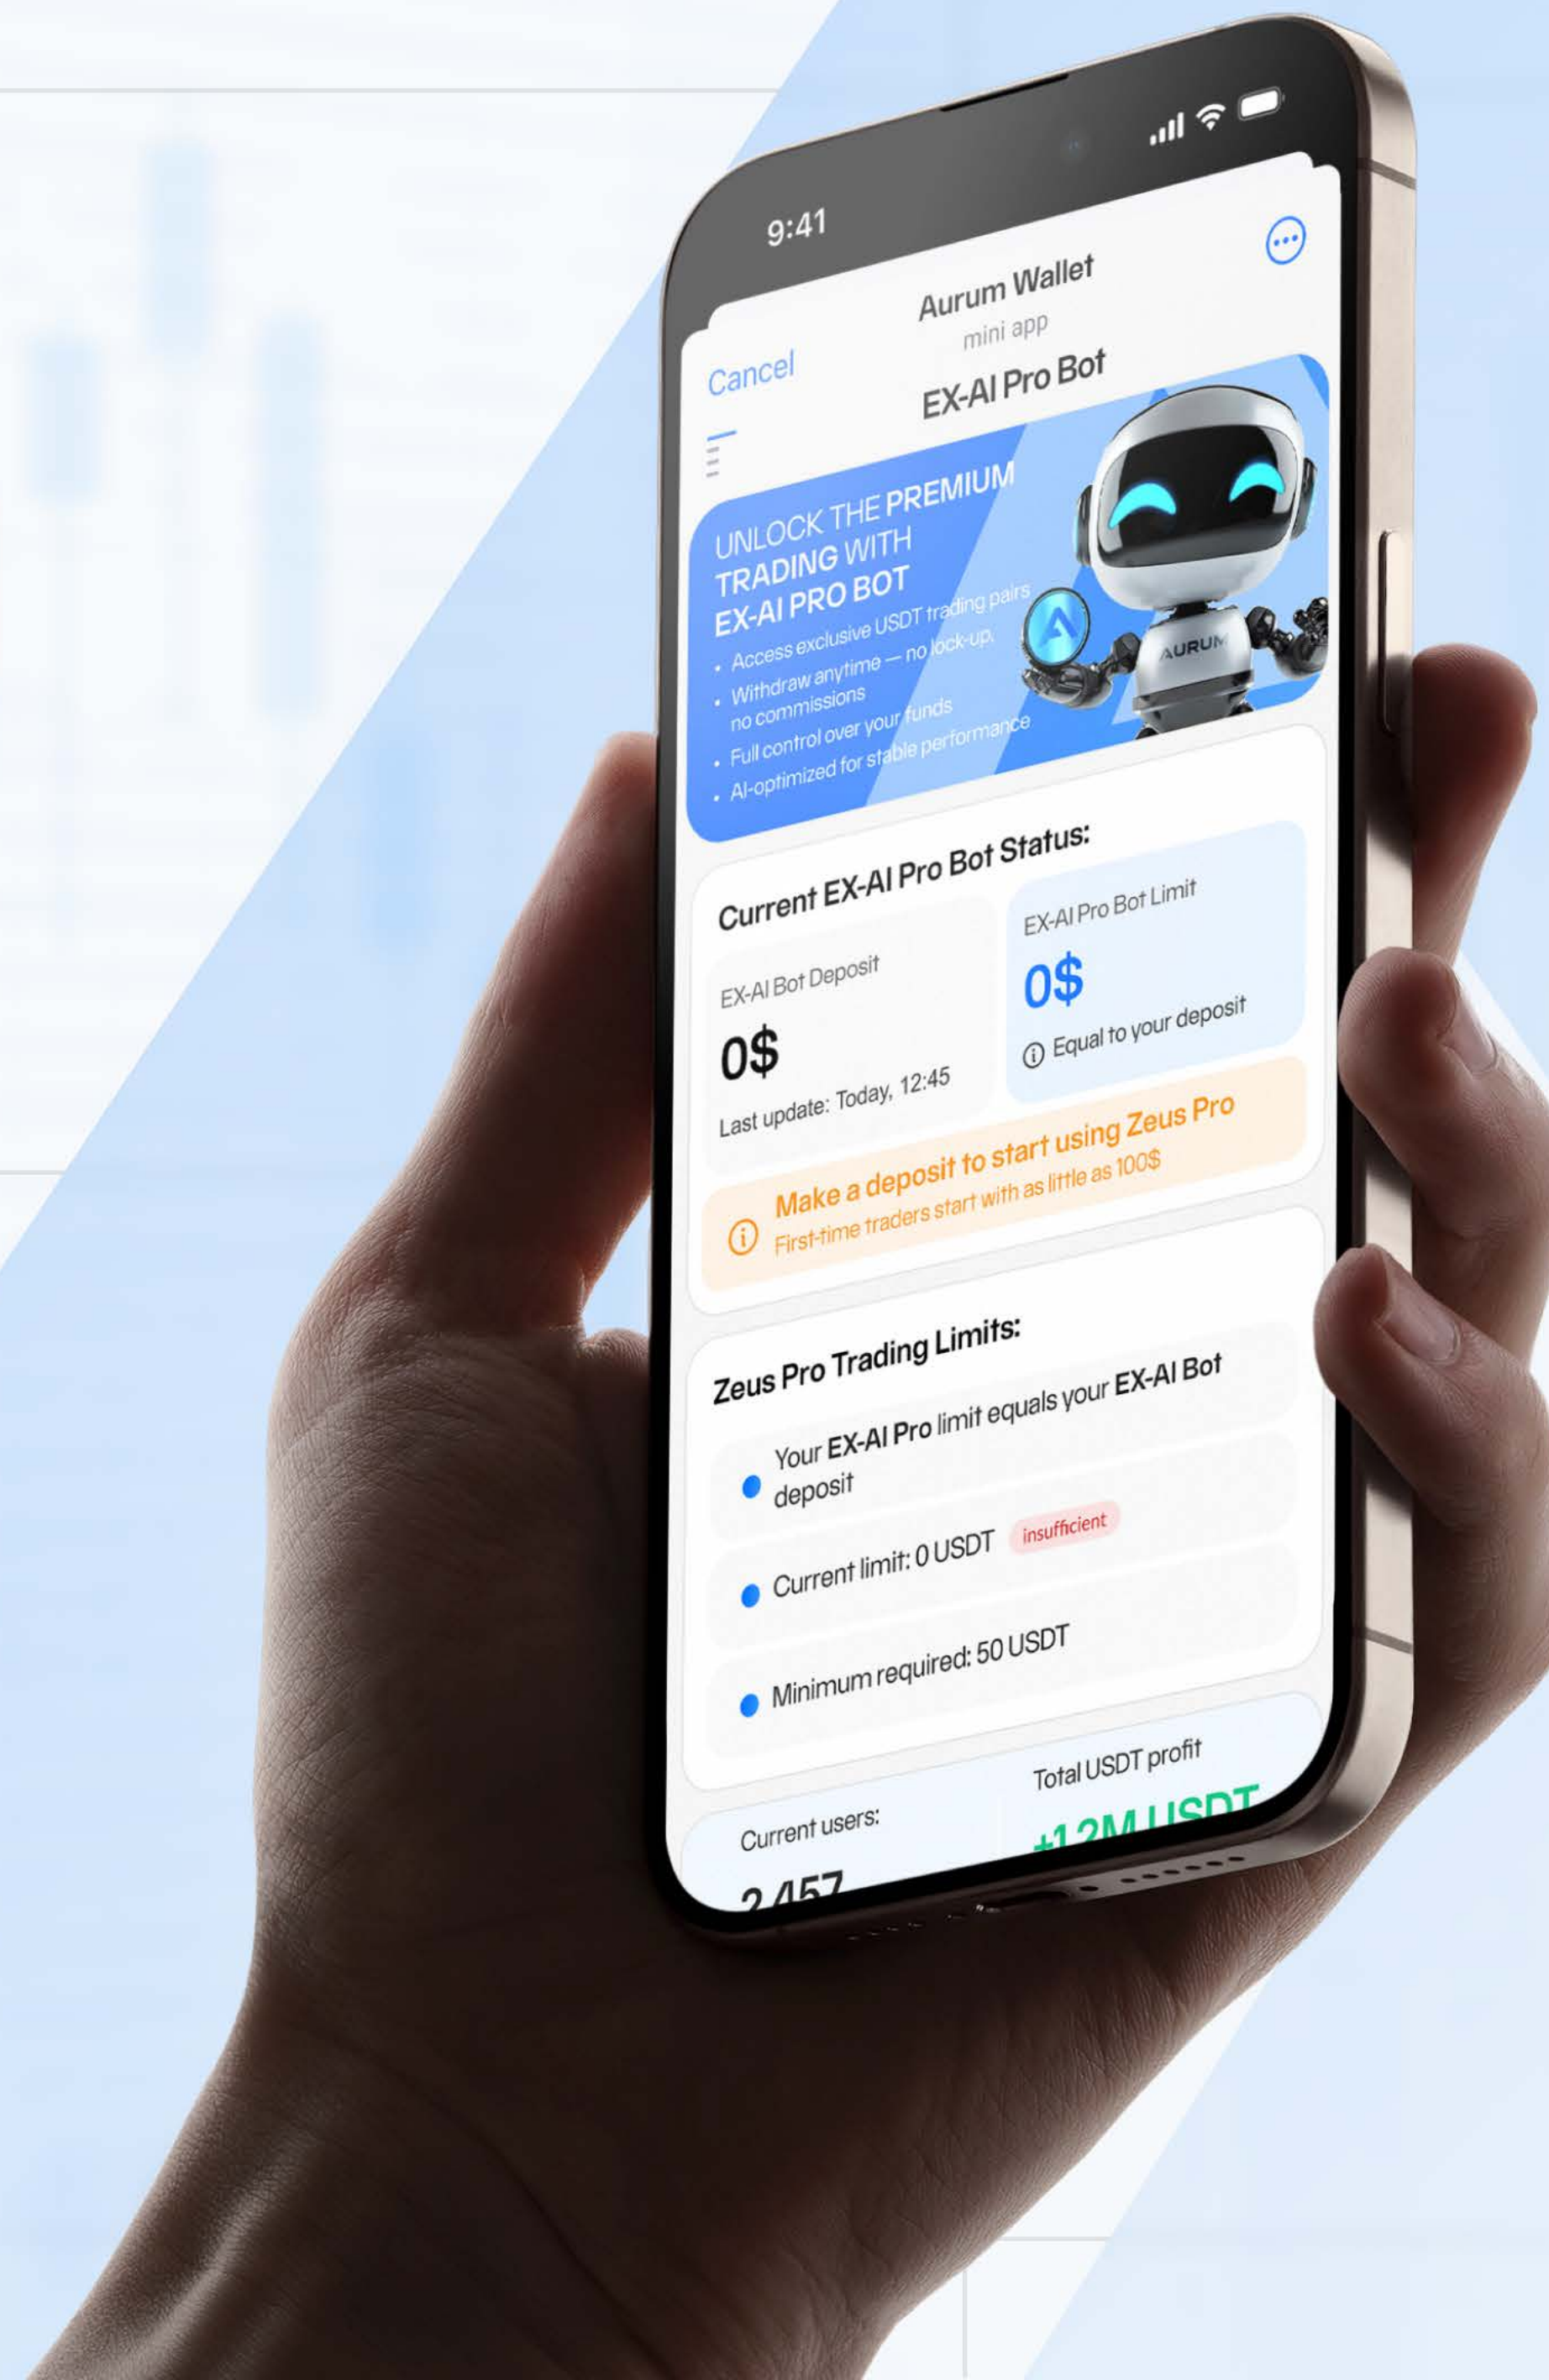

EX-AI Pro is only available if you already have an active EX-AI deposit.

Allocation = Your EX-AI Balance

You can allocate up to the full value of your current EX-AI deposit.

Minimum Entry Unchanged

The entry point stays the same — just 100 USDT.

AURUM ZEUS AI BOT

Your all-in-one AI tool for crypto trading, secure payments, and passive income — directly in Telegram.

Simple & seamless

Manage your digital assets and trade instantly without leaving Telegram.

Smart & autonomous

The bot works 24/7 with AI-driven trading and lets you compound earnings in real time.

Secure & transparent

Enjoy consistent returns while staying in full control of your funds.

KEY FEATURES & BENEFITS **AURUM ZEUS AI BOT**

Advanced AI Trading

- Automated spot trading on **BTC, USDT, ETH, BNB, PEPE, DOGE**.
- **Up to 15% monthly returns**, credited in the trading asset.
- **No lock-up** — funds always accessible.

Earning Potential

- BTC/USDT & ETH/USDT → **up to 10% monthly**
- BNB/USDT, DOGE/USDT & PEPE/USDT → **up to 15% monthly**

Flexible Deposits & Withdrawals

- Withdrawal Fee: **1%**
- Processing Time: **72 hours**
- Withdrawal includes **network fee**
- Withdrawals available anytime with **no hidden restrictions**

Transparent Real-Time Monitoring

Track trades live, monitor performance metrics, and see how the bot reacts to market conditions.

Security & User-Friendly Experience

Instant portfolio tracking, transparent reporting, and **24/7 support** — **all inside Telegram**.
